SPOPS 660

30 April 1946.

SUBJECT: Supplement to the Harbor Defense Project, Harbor Defenses of the Columbia.

TO: Commanding General, Army Ground Forces.

1. Reference is made to letter, Headquarters, Harbor Defenses of the Columbia, 660.2 (HDC: 660.2 HDG ARTY), 12 June 1944, subject: "Supplements to Harbor Defense Projects" with 2 Indorsements.

2. The supplement to the Harbor Defense Project, Harbor Defenses of the Columbia, submitted as an inclosure to the correspondence cited in paragraph 1 above, has been reviewed pursuant to the provisions of paragraph 2 e, AR 100-20, and is approved as of 12 August 1946 subject to the modifications and corrections noted in Inclosure 1 herewith.

3. The superseded documents are:

a. Annexes to the Harbor Defense Project, Harbor Defenses of the Columbia, Short Title CGA-AN-CR.

b. Local Board Proceedings Modernization Program Harbor Defenses of the Columbia, 1942.

4. One copy of the subject supplement is returned herewith as it is no longer needed by this headquarters.

5. When revising the supplement in accordance with the comments listed in Inclosure No. 1 herewith, recognition should be given to the elimination from the Harbor Defense Project of the following items of equipment.

6. a. 3" Armament both antiaircraft and seacoast.

b. Radio Sets SCR-296, 268 and 582 (Radar sites, however, are not eliminated)

6. It is requested that distribution of the revised copies be made pursuant to the approved distribution list.

7. Upon distribution of the revised supplement, action will be taken by this headquarters to direct destruction of the document listed in paragraph 3 a above.

FOR THE COMMANDING GENERAL:

3 Incls.

Incl. 1-Comments (in trip) ~~=====~~

Incl. 2-Copy Annexes, HD of the Columbia.

Incl. 3-Copy Appendices, HD of the Columbia

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

The following pertains to the Supplement to the Harbor Defense Project, Harbor Defenses of the Columbia, submitted as an inclosure to letter, Headquarters, Harbor Defenses of the Columbia, 660.2, 12 June 1944, subject: "Supplements to Harbor Defense Projects."

I REFERENCES

- A. Letter, War Department, AGO, AG 660.2 (1-14-43) OB-S-L-N, 2 February 43, subject: "Preparation of Supplements to Harbor Defense Basic Projects."
- B. Letter, War Department, AGO, AG 471 (28 Jan 44) OB-S-O, 11 February 44, subject: "War Reserve Ammunition, Seacoast Artillery."

II GENERAL

The following comments refer to pages or paragraphs of the Supplement to a Harbor Defense Project, Harbor Defenses of the Columbia. The references listed below, are except otherwise indicated, those listed in I above.

III COMMENTS**1. Title Page.**

- a. In the interest of uniformity among the various harbor defenses, it is suggested that the short titles HDOCL-AM-43 and HDOCL-AP-43 be assigned to the annexes and appendices respectively.
- b. Register numbers should be assigned.
- c. Paragraph 3 should be revised to indicate that only the annexes are bound in the present volume and that the appendices are separately bound.
- d. It is desirable that a revision date be included near the bottom of the title page. This date would be that shown for crystallization of the revisions pursuant to the comments herein.

2. Table of Contents. The separate binding and separate short title of appendices should be noted.**3. Authorities.**

- a. Clarification of paragraph 1 appears desirable. In view of the serial changes in the basic project which have not been incorporated in the document "Harbor Defense Projects for Harbor Defenses included in the Puget Sound - Columbia River Area, Parts I to IV" (Short Title OCA-P-PSOR) reference could also be made in paragraph 1 to the following correspondence which modified a basic project.

SUBJECT: Supplement to the Harbor Defense Project, Harbor Defenses of the Columbia.

TO: Commanding General, Army Ground Forces.

1. Reference is made to letter, Headquarters, Harbor Defenses of the Columbia, 660.2 (WDC: 660.2 HDG ARTY), 12 June 1944, subject: "Supplements to Harbor Defense Projects" with 2 Endorsements.

2. The supplement to the Harbor Defense Project, Harbor Defenses of the Columbia, submitted as an inclosure to the correspondence cited in paragraph 1 above, has been reviewed pursuant to the provisions of paragraph 2 e, AR 100-20, and is approved as of 12 August 1945 subject to the modifications and corrections noted in Inclosure 1 herewith.

3. The superseded documents are:

a. Annexes to the Harbor Defense Project, Harbor Defenses of the Columbia, Short Title CCA-AN-CR.

b. Local Board Proceedings Modernization Program Harbor Defenses of the Columbia, 1942.

4. One copy of the subject supplement is returned herewith as it is no longer needed by this headquarters.

5. When revising the supplement in accordance with the comments listed in Inclosure No. 1 herewith, recognition should be given to the elimination from the Harbor Defense Project of the following items of equipment.

6. a. 3" Armament both antiaircraft and seacoast.
b. Radio Sets SCR-296, 288 and 582 (Radar sites, however, are not eliminated)

6. It is requested that distribution of the revised copies be made pursuant to the approved distribution list.

7. Upon distribution of the revised supplement, action will be taken by this headquarters to direct destruction of the document listed in paragraph 3 a above.

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

- (1) Letter, War Department, AGO, AG 660.2 (9-16-40) M-WPD-M, 26 September 1940, subject: "Modernization of Harbor Defense Projects, Continental United States."
- (2) Letter, War Department, AGO, AG 660.2 (4-12-43) OB-S-SPDIO-M, 17 April 1943, subject: "Defense of Harbors Against Motor Torpedo Boats."
- (3) 6th Indorsement, War Department, AGO, AG 660.3 (10-20-43) OB-S-E, 24 February 1943, on letter, War Department, AGO 660.3 (9-29-42) OB-S-E, 20 October 1942, subject: "Revision of Underwater Defense Projects."
- (4) Letter, War Department, AGO, AG 660.2 (10-23-40) M-00GA, 1 November 1940, subject: "Revision of Antiaircraft Annex, Harbor Defense Projects."

b. Approval by this correspondence of the supplement as modified hereby should be noted in paragraph 3.

4. Annex A.

a. Paragraph 1.

- (1) As respects references to the basic project, since the basic project together with actions changing it (paragraph 3 a above) will be cited under the heading "Authorities," it is suggested that references to these actions be deleted from the subject paragraph and that a statement to the effect that the basic project together with modifying actions be cited in paragraph 1 under "Authorities" be substituted therefor.
- (2) The references cited in paragraphs 1 a (2) and 1 a (3) do not effect any changes in the basic project. The letter cited in paragraph 1 a (2) relates to fire control for 6-inch batteries, while the indorsement cited in subparagraph 1 a (3) approves the local board report which merely implements the basic project.
- (3) Accumulation in paragraph 1 of references to letters and documents merely implementing the basic project was not contemplated in the outline forwarded with reference A. Where appropriate, these references might be cited in the portions of the annexes to which they pertain. For example, the references involving salvage of obsolete armament might more successfully be cited following the tabulation in paragraph 5 e, Annex A. If retained in this paragraph, the references should be properly characterized to distinguish them from actions modifying the basic project.

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

- (4) Certain of the cited implementing references are not appropriate to the purposes of the supplement. Upon approval, the supplement supersedes the annexes short title CCA-AN-CR and approved expenditure programs and becomes the current authority for the approved harbor defense installations whether existing or under construction. Consequently, the references in subparagraphs b and c (1) should be deleted.

b. Paragraph 4.

- (1) Pursuant to the outline inclosed with reference A, subparagraph a should contain a brief description of the tactical organization. A list of armament is not required here since this information is readily available in paragraph 3 a and Exhibits 1-A and 1-A-1.
- (2) Since the modernization program is substantially complete with the exception of supply of the guns for Battery (Const.) No. 246 and temporary retention of Battery Murphy, it appears practicable to describe the interim tactical organization in terms of departure from the organization upon completion of the modernization program.

c. Paragraph 5a.

- (1) The model of guns for Batteries (Const.) Nos. 245 and 247 should be changed to M1 since the T2 gun has been standardized as the 6-inch Gun, M1.
- (2) 6-inch Guns, M1 will be supplied for Battery (Const.) No. 246. However, it should be noted in the tabulation that supply of the gun tubes is deferred pending availability of appropriate manufacturing facilities.
- (3) Information available to this headquarters indicates that construction on Batteries (Const.) Nos. 245 and 247 has been completed and that Battery (Const.) No. 246 is complete except for the emplacement of the guns.
- (4) In view of the large difference between the firing table maximum range of the 90mm AMTB gun and its maximum effective range against motor torpedo boats, a footnote applicable to the maximum ranges for the 90mm AMTB guns should be added to indicate the 7500 yard maximum effective range published in Appendix I, FM 4-5.

d. Paragraph 5b.

- (1) A statement to the effect that the supply of the gun tubes for Battery (Const.) No. 246 is deferred pending availability of manufacturing facilities should be added to subparagraph (1) (e).

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

- (2) A statement should be included in paragraph (2) (b) indicating whether the mobile 90mm guns for Battery (Tactical) No. 8 are located in the harbor defense or are in ordnance storage.
- (3) Reference in subparagraph (3) to the superseded buoyant mine project is neither necessary nor desirable. The buoyant project is obsolete and not pertinent to the present project.

e. Paragraph 5 e.

- (1) The heading of this paragraph should be changed to "Batteries Authorized for Exclusion from the Basic Project."
- (2) Battery Russell was eliminated from the harbor defense project and its salvage approved by 3d Indorsement, War Department, AGO, AG 400.93 (14 Nov 44) OB-S-SPOPS, 23 December 1944, on letter, Headquarters, Harbor Defenses of the Columbia 400.93, 14 November 1944, subject: "Salvage of Battery Russell, 10-Inch DC."
- (3) Battery Allen was eliminated from the harbor defense project and its salvage approved in 3d Indorsement, War Department, AGO, AG 400.703 (14 Apr 45) OB-S-SPOPS, 18 May 1945, on letter, Headquarters, Harbor Defenses of the Columbia, 400.93, 14 April 1945, subject: "Salvage of Battery Allen, 6-Inch D.C."
- (4) Where armament has been removed, it is desirable that that fact be noted in lieu of the caliber and model of gun and model of mount.
- (5) The statement as to partial salvage of Battery Mishler should be clarified. The references cited do not indicate the reasons for the partial salvage of that battery. The specific reasons should be briefly noted in this paragraph.

f. Paragraph 6. In view of the fact that ammunition allowances for 90mm and 37mm AMTB weapons are revised and published at frequent intervals in current War Department directives (letter, War Department, AGO, AG 471 (9 Jun 44) OB-S-DM, 10 June 1944, subject: "Day of Supply for Ammunition"), it appears advisable to omit detailed entries of the amounts of various types of ammunition for the particular weapons. A reference to the current authority governing these allowances and a statement regarding the ammunition storage for each battery with reference to its suitability and its compliance with the provisions of TM 9-1900 will meet the necessary requirements pertaining to AMTB weapons. It is desirable that the War Department directive cited above be referred to in lieu of subsequent extracts prepared by the Western Defense Command.

4

~~SECRET~~

II

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST

g. Paragraph 7. The tabulation in subparagraph b may be omitted and genes made to the tabulation in paragraph 5 a in order to avoid duplication oration.

h. Paragraph 8. This paragraph should be revised as necessary to re-
current status. In this connection, attention is invited to letter, War
Department, AGO, AG 616.33 (20 Jan 45) OB-S-3OPS, 17 February 1945, subject:
"for Long Range Camouflage Planting." (See paragraph 12 b (4) below).

1. Paragraph 9.

- (1) Data in this paragraph should be revised to reflect present status.
- (2) Where land is not owned in fee, it is desirable that the character of the interest be indicated.
- (3) All of the tracts held by lease, or by permit for project installations should be included in this tabulation although acquisition as set forth in Annex H has not been accomplished.
- (4) As respects Location No. 16, Camp Clatsop, 1st Indorsement, Headquarters, Ninth Corps Area, 323.7 - Clatsop, SPKIN, (AO-M), 25 April 1942, on letter, War Department, AGO, AG 323.7 Camp Clatsop (4-20-42) MR-M-SP, subject: "Designation of Camp Clatsop, Oregon as a sub-post of Fort Stevens, Oregon," indicates that authority for occupation of this tract is contained in a letter from the Acting Adjutant General, State of Oregon, 16 October 1941, stating that Camp Clatsop will be available for use any time it is required by the Army. Consequently, occupation of this tract appears to be by permit from the state of Oregon.

2. Exhibits for Annex A.

(1) Exhibit I-a.

- (a) In view of the new terminology used in T/O & E 4-260-1, dated 11 April 1944, and in FM 4-5, dated 20 June 1944, which eliminates the word "groupments" introduces the battalion into the tactical organization and changed the meaning of the word "group," this exhibit and other portions of the supplement should be revised accordingly. In order to decrease the number of changes, the symbol G will be considered applicable to the battalion. However, in the interests of clarity, it is desirable that this equivalency between this symbol and the battalion be noted in paragraph 4 of this annex.
- (b) The HECP should be shown separate from, but on the same level with, the harbor defense command post.

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST

- ~~SECRET~~
- (e) The composition shown for the mine battalion is contrary to that contemplated in paragraph 119, FM 4-5, 20 June 1944, which states that a mine battalion is composed of personnel, materiel, structures and vessels required to plant, operate and maintain a mine field. Under this policy, a mine battery and a mine flotilla should not be grouped with AMTB batteries. A possible tactical organization in conformity with present doctrine might consist of a gun battalion as shown in this exhibit, an anti-motor torpedo boat battalion consisting of two (2) AMTB batteries, and the mine battery as a separate battery directly under the harbor defense headquarters.
 - (2) Exhibit 1-4-1. In view of the degree of completion of the modernization program, this exhibit may be deleted and departures from the ultimate tactical organization shown on Exhibit 1-4 by means of footnotes. Battery Russell should be eliminated. (See paragraph e (3) above.)
 - (3) Exhibit 2-4.
 - (a) Information available to this headquarters indicates that Battery (Const.) No. 245 has been completed.
 - (b) Radio Sets, SCR-547 were distributed to harbor defenses as a special issue for training purposes only; they are not regarded as project or T/O & E equipment. Consequently, the SCR-547 at Location 5-1 should be deleted from this exhibit and not referred to elsewhere in the supplement.
 - (c) The abbreviation "MC" used in this exhibit and elsewhere throughout the supplement to designate the mine battery command post at Location No. 7 is the same as that commonly used to designate the mine casemate. (See Table C, Part 1, FM 4-155 which, although rescinded, represents common practice as respects symbols and abbreviations on fire control drawings.) In order to obviate the confusion arising from this identity of abbreviations, the mine battery command post at Location No. 7 should be designated as MACP throughout the supplement. This is the commonly used designation which is shown in FM 4-155.
 - (4) Exhibit 3-4-1. Battery Russell should be deleted from this exhibit. (See paragraph e (3) above.)
 - (5) Exhibit 4-4. The 7500 yard maximum effective range should be shown for each 90mm AMTB battery in lieu of the firing table maximum range. (See paragraph e (4) above.)
- ~~SECRET~~

~~SECRET~~DISTRIBUTION LIST
~~SECRET~~

- (6) Exhibit 5-A. The tracts now held or to be acquired at North Head should be clarified on this exhibit. Similarly the boundaries of the Fort Canby Reservation should be clearly shown.
- (7) Exhibit 8-A.
- (a) Since the Radio Set, SCR-296 for Battery (Const.) No. 243 has been installed, some rights must have been acquired in the tract pertaining to this installation. Upon this assumption, the tract should be shown on this exhibit and listed in paragraph 9.
- (b) For similar reasons it would appear that tracts B, C, D and E shown on Exhibit 2-H-2 should be included.
- (8) Exhibits 9-A and 9-A-1. From these exhibits, it is not clear whether an access right of way to Location No. 17, as well as cable easements, is involved.

5. ANNEX B.

a. Paragraph 1. Subparagraphs g (1) and h should be revised to reflect variance of the harbor entrance control post pursuant to letter, War Dept., AG 660.2 (3 Jul 44) OB-L-2, 6 July 1944, subject: "Harbor Entrance Control Post Port Stevens - Inactivation of."

b. Paragraph 2. The coordinates given for BC-E¹ S¹, SCR-296, BC-E¹ S¹ SCR-296; are at variance with data submitted with letter, Headquarters, War Defenses of the Columbia, 2 August 1943, subject: "Precise Orientation for Plotting Boards, M3 for Battery (Const.) No. 243, No. 246 and No. 247," which were used as a basis for manufacture of plotting boards for these batteries. Required revision should be accomplished.

c. Paragraph 3.

- (1) Fire control switchboard rooms should be added to this tabulation since they are considered to be elements of the fire control system.
- (2) Under T/O & E 4-260-1, the allowance of azimuth instruments for a combined NDOP-HEGP station is three (3) assuming that a harbor defense observation post is associated with the harbor defense command post. It is assumed that the stated requirement of two (2) azimuth instruments for the NDOP-HEGP is the number capable of economical use in the particular case.
- (3) Under the present tables of organization and equipment, no depression position finder is authorized for the G-1 station

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

in view of the height of instrument. However, if the Sunsay Depression Position Finder shown in the tabulation is on hand and installed it may be retained as a special project allowance for the particular instrument only. In this case, a note should be added indicating authorization for retention of the particular instrument only, and that no replacement is authorized.

- (A) It is assumed that the reference in subparagraph k (3) to a "mine casement" was intended to be to a mine casemate.
- (5) The panels BD-17 listed in subparagraph k have been superseded by panels BD-45 or BD-68. The obsolete equipment should be replaced by the modern types.

d. Paragraph 4.

- (1) The number of pair between post switchboards and to commercial switchboards should be given.
- (2) Information should be included as to the administrative telephone facilities available in the Fort Columbia area.

e. Paragraph 5. Description of teletype and telegraph facilities should be revised, where necessary, to reflect present status.

f. Paragraph 6.

- (1) Letter, War Department, AG 311.23 (21 Jun 43) OB-SPACLO-4, 23 June 1943, subject: "Frequency Assignment - Coast Artillery Harbor Defense Communications," which assigned frequencies for the harbor defense radio net, should be cited in this paragraph.
- (2) Radio Sets, SCR-177 are no longer authorized for issue to harbor defenses. The allowances under T/0 & E 4-360-1 for the HDCP is three (3) Radio Sets, SCR-543 of which two (2) may be commercial, and two (2) Radio Sets, SCR-281, one (1) of which is for temporary installation in a target towing vessel.
- (3) The Radio Sets, SCR-505 and 628 are issued for training purposes only. In view of the present restricted basis of issue, they are not considered as meeting project requirements and should be omitted from the supplement except for inclusion in the list of signal items in Appendix G.
- (4) With reference to subparagraph b (6), the number of Radio Sets, SCR-536 should conform to the allowances shown in

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

T/O & E 4-260-1 based upon the project requirement for nine flotilla vessels. (See paragraph 7 b below.) The one (1) SCR-536 for the mine planter is carried in T/O & E 4-104, as organizational equipment of the mine planter battery and should be indicated as such.

e. Paragraph 7.

- (1) The standard azimuth instrument and depression position finder for use in connection with base end data transmission systems are now the M2A1 models.
- (2) Under T/O & E 4-260-1 there is an allowance of one (1) Depression Position Finder, M2A1 for each gun battery BC station with a height of instrument of 74 feet or more. However, since each such gun battery BC station in the Harbor Defenses of the Columbia is combined with a base end station equipped with a depression position finder, the additional Depression Position Finder, M2A1 will not be required.
- (3) The Radio Set, SCR-547 shown for Battery (Tactical) No. 2 should be deleted. (See paragraph 4 j (3) (b) above.)
- (4) The Lewis depression position finder shown for the M_3^3 station is not authorized under T/O & E 4-260-1. If installed it may be retained but no requirement for a replacement can be established and a note to this effect should be appended. (See paragraph e (3) above.)

h. Paragraph 8. The adequacy of datum points for adjustment in range depression position finders at BY₁, BY₂, and BY₃ should be reviewed in the light of paragraphs 51 b (4) (b), 52 c (1) and Appendix III, FM 4-13, 5 November 1943. Additional datum points appear to be necessary, a project letter should be instituted.

i. Paragraph 10.

- (1) T/O & E 4-260-1, Changes No. 3, should be substituted for TDA 44 as authority for the Radio Sets, SCR-296.
- (2) The Radio Set, SCR-547 should be deleted. (See paragraph 4 j (3) (b) above.)
- (3) Authority for Radio Set, SCR-662 is letter, War Department, AGO, AG 413.44 (24 Jul 43) OB-S-SPHMS, 26 July 1943, subject: "Issue of Instructions on Replacement of SCR-562 Radar Set by SCR-662 Radar Set."

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST~~SECRET~~

J. Exhibits for Annex B.

- (1) Exhibit 3-B. This exhibit should be revised as necessary to reflect present status. Requirement for the leased circuit shown from "Fort Stevens" to the HCP - HCP is not understood.
- (2) Exhibit 3-B. This exhibit should be revised to:
 - (a) Show on the lines of the net the frequencies (symbols) assigned by the letter cited in paragraph f (1) above. Incorporation of the frequencies in the boxes representing the respective radio sets does not indicate the frequencies assigned for various purposes. It is also desirable that this exhibit carry a tabulation showing the frequencies in kilocycles corresponding to the symbol designations.
 - (b) Show air ground frequencies from the harbor defense command post and battalion command posts.
 - (c) The number of Radio Sets, SCR-536 should be revised in conformity with Changes No. 3, T/O & E 4-260-1. The Radio Sets, SCR-281 and SCR-536 on the mine planter should be omitted as these are organizational equipment of the mine planter battery under T/O & E 4-104.
 - (d) Show the SCR-281 installation in the target towing vessel as working with the HCP on γ_1 .
 - (e) Delete the SCR-208-SCR-628 net. (See paragraph f (3) above.)
 - (f) Eliminate G-1 and G-2 from the mine net. As respects G-1 see paragraph 4 j (1) (e) above.
- (3) Exhibit 4-B. Discussion of this exhibit will be made the subject of separate correspondence in view of certain technical questions which have arisen in connection with the use of fire control communication cable pairs for both telephone and data transmission. The Chief Signal Officer will provide a revised circuit diagram for review at a later date. It is contemplated that the supplement will be approved less this exhibit which can be inserted following its subsequent revision and approval.
- (4) Exhibit 5-B.
 - (a) Description and length of the lateral cables from the splices at location Nos. 2, 5B, 15 and 16 should be included.

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST**~~SECRET~~**

- (b) The projected 100 pair cable between Fort Stevens and Fort Canby should be shown completely to include the land and submarine sections. A convention, such as dot-dash lines, should be added to the legend for indicating the proposed cable in a manner not subject to confusion with the legend used to designate field wire.
- (5) Exhibit 6-B. The purpose of this exhibit is to show the geographical location of the major cables, and to serve as a key for interpretation of the cable schematic diagram. It is desirable that this exhibit be revised to show only major cables and terminals on one sheet. The War Department numbers assigned to submarine cables should be shown and the projected cable between Fort Stevens and Fort Canby should be included.
- (6) Exhibits 10-B, 12-B, 13-B and 14-B. These exhibits should be revised to show the maximum effective ranges of the depression position finders in lieu of presently shown limits. A rule for determination of range capabilities of depression position finders at various heights of instrument is contained in "Notes on Characteristics and Employment of Depression Position Finders," published 6 September 1940 by the Chief of Coast Artillery as follows:

"Under favorable conditions for observation, the depression position finder can be expected to furnish ranges suitable for use in computation of firing data to maximum ranges equal to 800 yards for each ten feet height of instrument."

- (7) Exhibits 11-B and 15-B. These exhibits should be revised to substitute 7500 yard maximum effective range for the firing table maximum range. (See paragraph 4 e (4) above.)
- (8) Exhibit 16-B.
- (a) Tract limits should be shown for Location 9 Nos. 1 and 2.
- (b) The combined station at Location No. 2 should be shown by means of three (3) triangles arranged accordingly to the relative locations of the stations in the structure. It is not apparent from the present arrangement that B_1^6 , S_1^7 and B_5^7 , S_5^7 are on the lower level while B_3^7 , S_3^7 is on the upper level. Also the location of the Radio Set, SCR-682 should be clarified. From this exhibit it is not apparent whether the SCR-682 is in the combined structure or in a separate structure. As respects symbols showing relative to location, attention is invited to Table C, Part 2, paragraphs f and g, FM 4-185. While this field manual has been

~~SECRET~~

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

rescinded, no manual has been published to take its place, and it represents common usage as respects abbreviations and symbols for seacoast artillery fire control charts.

- (9) Exhibit 18-B.
 - (a) Radio Set, SCR-547 should be deleted. (See paragraph 4 j (3) b. above.)
 - (b) The symbol for Battalion 2 should be revised to indicate that the station is a combined command post and observation post for the battalion.
- (10) Exhibit 21-B.
 - (a) The symbol for the switchboard should be revised to indicate that it is a fire control switchboard only.
 - (b) The mine casemate should be so labeled.
- (11) Exhibit 22-B.
 - (a) The G-1 station should be shown as a combined command post and observation post for the battalion.
 - (b) The symbols for the combined B¹ S¹ and B² S² station should be revised to show that these stations are on the same level. (See paragraph (8) (b) above.)
 - (c) The tract limits for the SCR-296 installation at Location No. 14 should be included.
- (12) Exhibit 24-B. The tide station listed in the tabulation in paragraph 3 as being at Location No. 11 should be shown on this exhibit.
- (13) Exhibit 25-B. The symbol for the combined B¹ S¹ and B⁷ S⁷ stations should be revised to indicate the actual relative location of the stations. (See paragraph (8) (b) above.)
- (14) Exhibit 26-B. The symbol for the combined station structure at Location No. 17 should be revised to show the relative location of the stations in the structure. (See paragraph (8) (b) above.)
- (15) Exhibit 28-B. This exhibit should be deleted. It does not concern project or T/O & E equipment. (See paragraph 4 j (3) (b) above.)

~~SECRET~~

~~SECRET~~DISTRIBUTION LIST~~SECRET~~6. Annex C.

a. Paragraph 1. Reference should be made to 3rd Indorsement, War Department, AGO, AG 660.2 (27 Jun 45) OR-S-E, 2 August 1945, on letter, Headquarters, Harbor Defenses of the Columbia 660.2, 27 June 1945, subject: "Requirements for Harbor Defense Searchlights," which established a project allowance of nine (9) fixed searchlights and thirteen (13) portable searchlights (including 3 AMTB searchlights) and to letter, Office, Chief of Engineers, SPEPR, 28 February 1944, subject: "Replacement of Fixed - Type Searchlights Installed in Harbor Defenses," which relates to replacement of fixed searchlights by portable searchlight units.

b. Paragraph 2. Any changes in assignments of searchlights which may be occasioned by change in the tactical organization as discussed in Paragraph 4 j (1) (c) above, should be reflected in this paragraph.

c. Paragraph 3. In the column "Place of Storage or Shelter" the place of contemplated peace-time storage should be given.

7. Annex D.

a. Paragraph 1. Reference to the original buoyant mine project should be deleted since that project is obsolete and has been superseded by the ground mine project.

b. Paragraph 2 b. The numbers of mine flotilla vessels of the several categories on hand at a particular time are regulated by current War Department directives issued from time to time. No over-all project allowance of vessels of the mine flotilla has been established, and the authorizations applicable to the superseded buoyant mine projects are in many cases obsolete. However, for planning purposes, establishment of a firm estimate of project requirements is necessary. Consequently, the following project requirements for vessels of the mine flotilla are established as being the number required to plant the groups of mines comprising the approved project within a reasonable time and to maintain the planted project under the conditions existing in this harbor defense.

<u>Vessel</u>	<u>Number Required</u>
Mine Planter	1
D. B. Boat	2
Mine Yawl	8

The above numbers of mine flotilla vessels should be shown as the project requirement for the harbor defenses.

e. Paragraph 3.

- (1) The existing shore facilities as set forth in this paragraph have been approved by previous War Department actions. However, additional facilities or modification of existing facilities may be required following War Department consideration of proposals resulting from

~~SECRET~~

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

letter, War Department, AGO, AG 471.86 (4 Mar 44) OB-S-E, 11 March 1944, subject: "Submarine Mine Explosives and Operations," which forwarded a report of the Joint Army and Navy Ammunition Board made to the Secretary of War, dated 14 February 1944. These proposals should not however, be entered in the supplement at this time.

- (2) With respect to the failure of the mine leading room to meet quantity distance requirements as stated in subparagraph e, suitable modification and augmentation is under consideration as a result of the proposals arising out of the letter cited in (1) above.
- (3) In subparagraph f, reference should be made to 7th Indorsement, Headquarters, Army Service Forces, SPOPS 678 (8 Oct 44), 10 October 1944, in letter, Headquarters, Harbor Defenses of The Columbia 663, 17 July 1944, subject: "Emergency Power - Mine Casemate," approved inclusion in the supplement of a power plant for furnishing emergency power for the mine casemate but deferred its accomplishment.

d. Exhibit 1-B. The Audio Reception System, M1 should be included in this exhibit.

8. Annex B.

a. Reference to the Radio Set, SCR-547 should be deleted from this annex. (See paragraph 4 j (3) (b) above.)

b. Paragraph 5.

- (1) References in subparagraph b to sound locators should be deleted since these are no longer provided for antiaircraft artillery.
- (2) The six (6) 40mm AA guns and the six (6) .50 caliber machine guns shown in subparagraph g as assigned for a close-in AA defense of strategic harbor defense installations should be deleted. Similarly, the number of each such guns shown in subparagraph e should be reduced to six (6). In the letter cited paragraph 3 a (4) above, twelve (12) 37mm AA guns and twelve (12) .50 caliber machine guns were authorized for the Harbor Defenses of the Columbia. This authorization was based upon the three (3) 12-inch mortar batteries and three (3) 6-inch D.C. batteries then in the harbor defenses and constituted the allowance pending completion of the modernization program. However, in view of the progress which has now been made toward completion of the modernization program, it is considered that the allowance of 40mm guns and .50 caliber machine guns for antiaircraft defense should be based upon the batteries to be retained. The allowance stated in letter referred to above is not to be

~~SECRET~~

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

considered additional to that authorized by Changes No. 3, T/O & E 4-260-1 for the retained batteries. Requirements for antiaircraft defense in addition to those provided by automatic weapons supplied for close-in defense of seacoast batteries, should be considered in estimating the requirements for reinforcing antiaircraft artillery.

c. Paragraph 4. In view of the periodic revision of ammunition allowances for automatic weapons, citation of the current authority governing allowances and inclusion of a statement regarding ammunition storage with reference to its suitability and compliance with the provisions of TM 8-1900 will suffice. (See paragraph 4 f above.) Information as to 90mm and 37mm guns which are shown in paragraph 6, Annex A need not be duplicated here.

d. Exhibits 1-E to 4-E inclusive. The 40mm guns and .50 caliber machine guns shown on Exhibit 1-E should be reduced to six (6) each, and corresponding reductions should be made on Exhibits 2-E through 4-E inclusive.

9. Annex F.

a. Paragraph 2.

- (1) Subsequent to the original preparation of reference A (the directive covering preparation of supplements), the Secretary of War in letter, War Department, AGO, AG 470.72 (20 Jul 48) OB-S-SPDDO-M, 25 July 1948, subject: "Spare Canisters for Collective Protectors Installed in Fixed Seacoast Fortifications," prescribed that the allotment of spare canisters should be based upon the number of installed canisters. Since the number of canisters installed in protective collectors varies, it is necessary that data be included as to the number of installed canisters for each collective protector installation.
- (2) In accordance with the letter cited in paragraph (1) above, the requirements for reserve canisters should be revised to place them on a basis of two (2) reserve canisters per installed canister. Also, a note should be added to indicate that one half of the reserve canisters are carried in local storage and one half are stored by the Chief of Chemical Warfare Service, earmarked for the harbor defense.

10. Annex G.

a. In view of the recent publication of tables of organization and equipment for fixed harbor defense organization and installations, and the substantial changes from the previous bases of allowances which are effected thereby, it is considered desirable that this appendix be rewritten to accord with the new tables of organization and equipment which, insofar as concerns harbor defense artillery, replace Tables of Basic Allowance No. 4 and changes thereto.

~~SECRET~~

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

b. Pursuant to paragraph 5 b of "General Notes on Preparation" included with reference A, items of submarine mine equipment should not be included in Annex G, and reference to Table of Allowances 4-4 should be deleted in paragraph 1.

c. Reference in paragraph 1 a to the Local Board Report should be deleted inasmuch as that document will be superseded upon approval of the element.

d. Exhibit 1-G.

- (1) In conformity with Changes No. 3, T/O & E 4-280-1, the following changes should be made:
 - (a) Designation of tactical commands should be changed to conform with current nomenclature; for example, substitution of battalion for group.
 - (b) The following elements should be added:
 1. Harbor Defense Searchlight Battery.
 2. Mine Yaws.
- (2) In lieu of the previous fort allowance, T/O & E 4-280-1 has set up an allowance to battalion and group command posts which are also fort command posts. Forts Canby and Stevens would be included in this allowance. It is considered that these two (2) allowances, in addition to the similar allowance for the harbor defense, will furnish sufficient equipment to meet the harbor defense needs.
- (3) It is considered that not more than one (1) searchlight command post is warranted for the Harbor Defenses of the Columbia. The searchlight command functions of the battalion command posts when searchlights are assigned to them will presumably be conducted as an activity of the battalion command post. Searchlight command posts are considered as meaning only those separate installations which are established primarily for searchlight direction and control.
- (4) Any changes in the tactical organization resulting from the discussion in paragraph 4 j (1) (e) above should be reflected in this exhibit.
- (5) Mine loading rooms, cable tank house, T.M.T. magazines, mine store houses, boat house, mine wharf and boat dock should be deleted since this exhibit was not contemplated to cover submarine items. (See paragraph b above.)

~~SECRET~~

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~e. Exhibit 2-G.

- (1) Since the types of azimuth instruments and depression position finders for batteries with data computers are different from those provided for batteries without data computers it is desirable that the tabulations for these two types of batteries be separated.
- (2) As respects Batteries (Tactical) Nos. 1 and 3, a footnote applicable to the BC stations should be added to indicate that although the Depression Position Finder M2A1 is authorized in view of the height of instrument, none is to be provided because of the combination of BC stations with base end stations.
- (3) The number of spotting stations for Battery (Tactical) Nos. 2 and 6 should be changed from 1 to 0. Spotting facilities for 80mm AMTB batteries are included in the battery allowance.
- (4) It should be indicated by a footnote that the power plants for Battery (Tactical) Nos. 2, 4, and 6 and the magazines for Battery (Tactical) No. 4 are not considered in computing of signal requirements.

f. Exhibits 3-G-1 to 3-G-3 inclusive.

- (1) These exhibits should be rewritten to reflect all changes herein mentioned and to include only the articles shown in the appendix in Changes No. 3, T/O & E 4-260-1, or included in project allowances. Organizational and individual equipment should not be included. The quantity entries that are desired are those that are needed for the complete project, whether or not these quantities are on hand. Limited standard items on hand which are considered to be adequate substitutes for the standard items (such as Finder Depression Position Lewis M1907, Finder Coincidence Range or Telescope Observation M1908) should be covered in footnotes. Shortages of authorized equipment should be entered in the appendix portion of the supplement in the proper cost estimate and priority guide for the type of equipment concerned and the element of the defense in which the shortage exists.
- (2) The cable items given in Exhibit 3-G-1 should be deleted since they are not considered items of equipment for the purposes contemplated in this exhibit.
- (3) The notes to these exhibits which pertain to allowances incorporated in T/O & E 4-260-1 should be deleted.
- (4) The item Projector and Support, Signal Ground, M4 should be deleted since this is an item of post, camp and

~~SECRET~~

DISTRIBUTION LIST

~~SECRET~~

station equipment and consequently does not comprise T/O & E or project equipment.

- (5) Exhibit 3-G-2 (a) should be deleted. (See paragraph b above).

g. Exhibit 3-G-4. This exhibit may be omitted inasmuch as Chemical Warfare Service items are not included in Changes No. 3, T/O & E 4-260-1 and information regarding the numbers of collective protectors and canisters is easily available in Annex F.

h. An exhibit should be added to the 3-G series showing required quantities of the quartermaster items listed in Changes No. 3, T/O & E 4-260-1.

11. Appendices.

a. A title page should be included.

b. Appendix I.

- (1) Items 1-E, Priorities 1-6 inclusive.

(a) The camouflage sets should be revised in conformance with the allowances stated with Changes No. 3, T/O & E 4-260-1.

(b) The items for passive protection - engineer construction and for camouflage sets should be deleted since these items are no longer authorized for inclusion in the harbor defense supplement. Only the features noted in paragraph (4) below are approved for inclusion at the present time.

- (2) Item 1-E, Priority 7. This item should be deleted since it relates to items which are organizational equipment under T/O & E 4-260-1.

- (3) The power plant authorized for inclusion in the supplement by 7th Indorsement, Headquarters, Army Service Forces, SPOPS 675 (5 Oct 44), 10 October 1944, on letter, Headquarters, Harbor Defenses of the Columbia, 663, 17 July 1944, subject: "Emergency Power - Mine Casemate," should be included.

- (4) An item should be included to cover the permanent planting features of the camouflage plan at an estimated cost of \$50,000 as presented in 2d Indorsement, Office of District Engineer, Portland, Oregon, PADPG/DPO 600.96, 16 December 1944, on letter, Office, Chief of Engineers, GE 618.53 (Columbia River) SPMT Ref GM 109269, 7 November 1944.

subject: "Plans for Long Range Camouflage Planting." A notation should be included to the effect that the Secretary of War, in letter, War Department, AGO, AG 516.33 (20 Jan 45) OB-S-SPOPS, 17 February 1945, subject: "Plans for Long Range Camouflage Planting" directed that accomplishment be deferred for the period of the present emergency.

e. Appendix II.

- (1) Priorities 1-6 and Priority 7, Items 1-8 to 5-8 inclusive. Records in the office, Chief Signal Officer indicate that signal equipment included in the approved harbor defense project has been furnished.
- (2) Priority 7, Items 4-8 to 6-8 inclusive. The data and estimates contained in these items should be revised in conformity with the following cost estimates made by the Chief Signal Officers.

MATERIAL

3,600' of 100 pr. Lead Covered Cable WC 409 estimated @ \$.31 per foot.....	\$ 1,116.00
20,000' of 100 pr. Single Tape Armored Cable WC 368 estimated @ \$.60 per foot.....	12,000.00
28,000' of 100 pr. Double Wire Armored Subm. Cable WC 359 estimated at \$2.00 per foot.....	56,000.00
4 cu. W.E. Co. 124G Lead Coil Cases each containing 50 W.E. Co. 632 Leading Coils estimated @ \$100.00 each.....	400.00

d. Appendix III.

- (1) Any equipment furnished since preparation of this appendix should be deleted.
- (2) The quadrants and bare sights should be deleted inasmuch as these are SMC equipment accessory to the weapons to which they pertain.
- (3) The item in Watch wrist, 7-jewel should be deleted since this is an item of organizational equipment.
- (4) Under item 1-O, Priority 3, Guns 6-Inch T2 should be changed to read Guns 6-Inch M1 and the item Clinometer, M1912 A1 should be deleted since this is an item issued to the harbor defense and battalion command posts under T/O & E 4-260-1.
- (5) Item 2-O, Priority 7 should be deleted. (See paragraph 8 b (2) above.)
- (6) Item 1-O, Priority 7 should be revised to include only one (1) instrument in order to conform to the allowances stated in Changes No. 3, T/O & E 4-260-1.

e. Appendix IV. The items contained in this appendix should be deleted when as funds pertaining thereto have been allocated.

f. Appendix I.

- (1) Item 1-K, Priority 4 should be deleted in accordance with the remarks contained in paragraph 11 a above. If acquisition of this tract is considered necessary, a complete showing should be made in separate correspondence.
- (2) Item 1-K, Priority 2 should be revised in accordance with the remarks contained in paragraph 11 b above. Necessity for acquisition of a tract larger than that contemplated in the endorsements cited in that paragraph should be presented in separate correspondence.

g. Appendix VI. This appendix should be revised in accordance with the items contained in b through e above.

SUPPLEMENT
TO
HARBOR DEFENSE PROJECT
HARBOR DEFENSES OF THE COLUMBIA
1944

AUTHORITIES

1. This document is a supplement to the document entitled "Harbor Defense Projects for Harbor Defenses included in the Puget Sound-Columbia River Area, Parts I to IV", (Short title CCA-P-PSCR). The latter document was approved by the Secretary of War in 1st Indorsement, file AG 660.2 (10-22-32) (Misc) E, dated 23 February 1933. The first revision was approved by the Secretary of War in 2nd Indorsement, file AG 660.2 (11-9-37) (Misc) E, dated 26 February 1938.

2. The original annexes to the Harbor Defense Project, Harbor Defenses of the Columbia were prepared by a Board of Officers appointed by secret letter, Hq., Ninth Corps Area, file -/96, 13 April 1933, addressed to the Commanding Officer, Harbor Defenses of Puget Sound. The original annexes were revised in accordance with the directive contained in the 10th Indorsement, TAG, file AG 660.2 (2-21-35) (Misc) E, 28 August 1935, to basic letter, Hq., Harbor Defenses of Puget Sound, file 660.2 secret-96, 21 February 1935, subject: "Annexes to Project for Harbor Defenses of the Columbia," and approved by the Secretary of War in the 19th Indorsement, AG 660.2 (2-21-35) (Misc) E, dated 30 June 1937. Short Title of the approved Annexes was CCA-AN-CR.

3. The revision of annexes to the Harbor Defense Project, Harbor Defenses of the Columbia, was directed by 3rd Indorsement, War Department, AGO file AG 660.2 (1-9-43) OB-S-E, 13 February 1943, to letter, Headquarters, Harbor Defenses of Puget Sound, file 660/381, 9 January 1943, subject: "Harbor Defense Supplements (or Annexes)."

(The Local Board Report, Modernization Program, was approved by this reference).

b. Annexes to Harbor Defense Project (Short title CCA-AN-CR, 30 June 1937). These annexes were superseded by the 1942 and 1943 expenditure programs.

- (1) Eighteenth Indorsement, Office, Chief of Engineers, no file number (17th Indorsement, file AG 660.2 (10-15-41) MSC, 20 February 1942) 25 April 1942, to letter, Headquarters, Harbor Defenses of the Columbia, file 660.2, 15 October 1941, subject: "Expenditure Program, SCD Funds, FY 1942, Harbor Defenses of the Columbia." (This reference approved the FY 1942 Expenditure Program for the Harbor Defenses of the Columbia).
- (2) Third Indorsement, Office, Chief of Engineers, file C of E, 662B (Columbia River) CM-16183 SPEOF, 10 September 1942, to letter, Headquarters, Harbor Defenses of the Columbia, file 334, 11 June 1942, subject: "Expenditure Program, Seacoast Defense Funds, FY 1943." (This reference approved the FY 1943 Expenditure Program for the Harbor Defenses of the Columbia).

c. Underwater Defense Project.

- (1) The Underwater Defense Project was incorporated in the Annexes to Harbor Defense Project, Harbor Defenses of the Columbia (Short title CCA-AN-CR 30 June 1937) and approved by the Secretary of War in the 19th Indorsement, file AG 660.2 (2-21-35) (Misc) E, dated 30 June 1937.
- (2) Sixth Indorsement, War Department, AGO, file AG 660.3 (10-20-42) OB-S-E, 24 February 1943, to letter, War Department, AGO, file AG 660.3 (9-29-42) OB-S-E, subject: "Revision of Underwater Defense Projects" dated 20 October 1942. (This reference approved the conversion of the field from buoyant to ground type mines).

- (3) Fifth Indorsement, Headquarters, Army Service Forces, file SPRMS 660.3 (15 June 43), 31 August 1943, to letter, Headquarters, Harbor Defenses of the Columbia, file 660.3, 15 June 1943, subject: "Revision of Underwater Defense Plan, Harbor Defenses of the Columbia, Fort Stevens, Oregon." (This letter approves the details of the revised underwater defense project).

d. Salvage of Obsolete Armament.

- (1) Third Indorsement, War Department, AGO, file AG 470 (9-18-42) OB-S-SPDDO, 28 October 1942, to letter, Headquarters, Harbor Defenses of the Columbia, file 400.93, 18 September 1942, subject: "Salvage of Obsolete Armament," with inclosure thereto.
- (2) Secret letter, Chief of Ordnance, 30 October 1942, file SPOFX Property and Salvage Section, OO 400.702/11, subject: "Disposal of Obsolete Armament, Harbor Defenses of the Columbia."
- (3) Third Indorsement, War Department, AGO, 4 October 1943, file AG 400.7 (5 Sep 43) OB-S-E, to letter, Headquarters, Harbor Defenses of the Columbia, 5 September 1943, file 662, subject: "Salvage of Battery Pratt, 6" DC, Fort Stevens, Oregon." (This reference approved the salvage of Battery Pratt).

e. Anti-Motor Torpedo Boat Project.

- (1) Secret letter, TAG, 17 April 1943, file AG 660.2 (4-12-43) OB-S-SPDDO-M, subject: "Defense of Harbors Against Motor Torpedo Boats," with six (6) Inclosures thereto.

f. Harbor Defense Searchlights.

- (1) Third Indorsement, War Department, AGO, file AG 660.2 (27 Jun 43) OB-S-E, 2 August 1943 to letter, Headquarters, Harbor Defenses of the Columbia, file 660.2, 27 June 1943, subject: "Requirements for Harbor Defense Searchlights."

2. PURPOSE.

- a. The purpose of this supplement is to amplify the Basic Project and is intended to furnish a concise record of the status, both of existing harbor defense fortification construction and equipment, and of new or modified construction which has been approved by the War Department for accomplishment. One of the principal purposes is to provide the basis for advance procurement of funds and materials necessary to complete approved items. A second important purpose is to make available to those concerned information of a technical and tactical nature which is not otherwise available in usable form.

3. MISSION.

- a. To deny access to and use of the Columbia River by enemy ships.

b. Navy and Air Corps Coordination.

- (1) Close cooperation with the Navy and the Fourth Air Force is established. Liaison with the Navy is established in the Harbor Entrance Control Post, which structure also contains the Harbor Defense Command Post. In the Harbor Entrance Control Post the Navy maintains direct communication by wire and radio to the Naval Station, Astoria, Oregon, the Naval Air Station, Tongue Point (Astoria), the U. S. Coast Guard and Captain of the Port, Astoria, Oregon, and the Harbor Entrance Control Post Signal Station on Cape Disappointment. Liaison with the Fourth Air Force is maintained by the Army in the Harbor Entrance Control Post by direct tactical wire communication through the tactical switch at Portland, Oregon (Seaport) and Seattle, Washington (Seatac).

c. Priority of Installations.

- (1) The armament approved for the Harbor Defenses of the Columbia after completion of the modernization project is listed below in order of tactical importance to allow other echelons to determine priorities to be assigned to the various project items.

<u>Order of Importance</u>	<u>Tactical No.</u>	<u>Name</u>
1	1	Battery (Const) #247

- b. (1) Batteries (Const) #245, #246, and #247. (Tactical Nos. 5, 3, and 1).
- (a) Authorized under provisions of Paragraph 1a, Section I, Annex A.
 - (b) Emplacements of #245, #246 and #247 are completed.
 - (c) Tubes, shields, and carriages of #247 and #245 are installed, shield and carriage only of #246 are installed.
 - (d) Ordnance materiel to complete the battery is as indicated in Appendix III.
 - (e) Signal materiel to complete the battery is as indicated in Appendix II.
- (2) AMTB Batteries No. 1 and No. 2 (Tactical Nos. 2 and 6).
- (a) Authorized under provisions of Paragraph 1a, Section I, Annex A.
 - (b) Construction and installation of the fixed 90mm guns M1 on carriage M3 are complete for each battery. Installation of the 90mm mobile guns M1, mounted on carriage M1A1, is complete at AMTB No. 1 (Tactical No. 2). ~~Mobile 90mm guns M1 on carriage M1A1 of AMTB No. 2 (Tactical No. 6) were returned to Berlin. Assembled as they were not required under Category "A," 3448.~~
 - (c) Ordnance materiel to complete the battery is as indicated in Appendix III.
 - (d) Signal materiel to complete the battery is as indicated in Appendix II.
- (3) Mine Project.
- (a) Original project authorized for buoyant type mines by reference 1c (1), Section I, Annex A.
 - (b) Conversion to ground type mine field approved by War Department and Navy Department by Paragraph 1c (2), Section I, Annex A. Conversion completed 1 May 1944.

DECLASSIFIED

REPRODUCED AT THE NATIONAL ARCHIVE

3d Batt. W.C. By [Signature] NARS Date 5/14/44

05-35000

2d Det 42 salvo Hq AG Col., 400.93, 18 Apr 42

subj: "Salvage of Obsolete Ammunition"

appears Local Board Report in ^{ASST} communication of 2d
salvage of ammunition with modifications recommended in
not 3d Det AG WDC, 660.24 D Col (4D) 23 Apr 42.

Report states that AGCP-HECP has been

constructed in Mishler emplacement. Gun wells
have been covered with timbers & entire emplacement
covered with earth & sod. Gun wells & upper
galleries covered with asphaltic cement to prevent
water seepage into AGCP-HECP the walls & ceiling
of which have been covered with fiber board
with wiring & cables behind it. Removal of
ammunition would require removal of camouflage
& would cause seepage through cracks & fissures
caused in emplacement by moving the ammun.
likely to damage wall board beyond repair &
cause communication failures.

(AS Action (Memorandum for C of O Hq AG SP 00
470 Ammunition), 28 Oct 42, subject ^{Obsolete Ammunition AG Columbia} directs
that no action will be taken to dispose of Battery
Mishler other than lead counterweights, ammunition
trucks & miscellaneous iron.)

Action by C of O is ltr 00 400.702/11(S) SP 00
Prop & Salv Sect, 30 Oct 42 sub j same as AS Action.

ANNEX A
SECTION III - MISCELLANEOUS

7. DEFENSE AGAINST MOTOR TORPEDO BOATS.

a. Authorization of Anti-Motor Torpedo Boat batteries and allocation of armament was authorized as indicated in Paragraph 1e, Section I, Annex A.

b. Tabulation of Anti-Motor Torpedo Boat armament:

	<u>AMTB No. 1</u>	<u>AMTB No. 2</u>
(1) Battery Tactical Number	2	6
(2) Battery Name	AMTB No. 1	AMTB No. 2
(3) Number & Caliber of Guns	4 - 90mm M1 2 - 37mm M1A2	4 - 90mm M1 2 - 37mm M1A2
(4) Number & Type of Mounts	2 - Fixed M3 2 - Mobile M1A1 2 - Mobile M3	2 - Fixed M3 2 - Mobile M1A1 2 - Mobile M3
(5) Status of Battery	Emplaced	Emplaced except for 2 - 90mm M1, carriage M1A1. (See Par 5b) (b) preceding).
(6) Site (Exhibit 18 B & 23B)	Location 5A	Location 9A
(7) Arcs of fire and ranges	Exhibit 4-A	Exhibit 4-A

8. PROTECTIVE CONCEALMENT.

a. The program of protective concealment for the Harbor Defenses of the Columbia was authorized by:

- (1) Letter, C of E, 27 May 1942, file C of E, 618.33
58 SPEOF, subject: "Camouflage of Fixed Seacoast Defense Installations," to the District Engineer, Portland, Oregon, through the Division Engineer, North Pacific Division.
- (2) Letter, TAG, 5 March 1943, file AG 381 (2-25-43)
OB-S-SPAAC-M, subject: "Passive Protective Measures."

b. The protective concealment project of tactical installations of the Harbor Defenses of the Columbia consists of flat top nets, artificial trees, dummy houses, transplanting of natural vegetation, and resodding as necessary. The gun wells are covered by a separate framework which can be tripped and cleared from the guns in a matter of seconds. All structural supports are rugged in design to withstand the severe wind storms and winter gales which are prevalent in this area. Nets are generally of fibreglass, garlands, and chicken feathers, and spray painted during the various seasonal changes to conform to the natural surroundings. Dummy batteries have been constructed and poorly camouflaged to lend deception to the over-all plan. Personnel shelters on barren sand spits or dunes have been constructed deep in the sand and mounded over to appear as dunes wherever possible. Shelters in wooded areas are dispersed under natural cover. The construction batteries are mounded over with sand and thickly planted with natural vegetation. All elements constructed as part of the modernization program,

~~SECRET~~

~~SECRET~~ANNEX A
SECTION III - MISCELLANEOUS
(Continued)

or in accordance with specific directives, have been fully camouflaged under the authority contained in letter, War Department, The Adjutant General's ^{Office}, file AG 381 (2-25-43) OB-S-SPAAC-M, 5 March 1943, subject: "Passive Protection Measures" except as modified by a curtailed policy in regard to passive protection directed by letter, War Department, The Adjutant General's ^{Office}, file AG 381 (15 Nov 43) OB-S-SPAAC-M, 17 November 1943, subject: "Passive Protection". Based on the latter directive, the Commanding General, Army Service Forces, by 6th Indorsement, file SPRMS 600.96 (2 Dec 43), 23 March 1944, to letter, Headquarters Western Defense Command, 2 December 1943, subject: "Passive Protection", authorized the preparation of plans only for the complete camouflage of Batteries No. 245, No. 246, and No. 247. No field work is to be initiated at this time but, the availability of the plan will permit future work, whether done by troops or necessitated by an emergency, to conform to an approved plan for the camouflage of the structures concerned.

c. Post installations, buildings and streets are "toned down" by use of camouflage paints and marked with disruptive patterns. The effect from the air is excellent and visibility of post areas is considerably reduced.

d. High maintenance costs are experienced due to storm damage caused by high wind velocities and a freak winter condition called a "silver thaw" which is rain freezing as it strikes the ground or nets. This ice condition at times gets several inches thick and places tremendous weights on all flat tops causing them to sag and collapse. All nets usually require spray painting about four times annually due to wide variations in seasonal color changes of natural vegetation.

V

Camp or area at Fort Stevens 45° occupied by
2493 CA. Returned to custody of Ore. on 27 Aug 41 where
2493 CA moved to Stevens. Camp used in spring &
summer of 1941 & returned to state control 12 Aug 41.
In spring of 1942 was occupied by 25 troops by command
of Adjutant Gen. state of Ore.

To fix responsibility for its maintenance &
controlling, the WDAGO, AG 323.7 Camp Clatsop (4-20-42)
MR-M-SP subj "Designation of Camp Clatsop, Oregon, as
a sub-post of Fort Stevens, Oregon" designated it a
sub-post of Fort Stevens. This does not appear to be
suitable authority for its being held by the government.

Ltr fr. Acting AG. state of Ore., 16 Aug 41 stated Camp
Clatsop would be available for use any time
it is required by the Army. (This ltr cited in
ref dtd by 95 CA, 323.7-Clatsop, SPKIH(AG-M), 25 Apr 42
as basic ltr cited above.) This would appear to be
authority for occupation at present time. Note that 2 SP's
are only tactical installations at Camp Clatsop.

SECRET

DESCRIPTION OF FORT COLUMBIA MILITARY RESERVATION

All that certain tract of land situated in Pacific County, Washington, and described as follows:

Beginning at a concrete monument which is South 752 feet and East 1534 feet from the section corner common to sections 8, 9, 16 and 17, Township 9 North, Range 10 West of the Willamette Meridian, thence from said monument by metes and bounds,

- S. $24^{\circ}46'$ W., 2436.2 feet, to a 6" x 3' sewer tile filled with concrete and marked U. S. M. R.,
- S. $24^{\circ}46'$ W., 210.4 feet, to similar concrete filled sewer tile marked U. S. M. R.,
- S. $24^{\circ}46'$ W., 263.0 feet, to a third such monument marked U. S. M. R.,
- S. $23^{\circ}31'14''$ W., 789.8 feet, to a point on the section line between sections 16 and 17, which point is the initial point of the original tract deeded to the United States for a military reservation;

Thence following said original reservation boundary,

- S. $24^{\circ}30'$ W., 412.5 feet, to Government meander line,
- S. 29° E., 412.5 feet,
- S. 33° E., 651.42 feet,
- S. $46^{\circ}30'$ E., 4125.0 feet,
- S. $62^{\circ}30'$ E., 485.1 feet, to point where boundary leaves the meander line,

Thence,

- N. $24^{\circ}30'$ E., 1485.4 feet, to a concrete post,
- N. $24^{\circ}30'$ E., 257.4 feet,
- East 51.5 feet, to a concrete post,
- N. $24^{\circ}30'$ E., 666.6 feet, to a concrete post,

Thence leaving the original boundary and running east 1821.6 feet along the north boundary of the P. J. McGowan Donation Land Claim to the southeast corner of lot 9 of section 22,

Thence north 3730.32 feet to a hemlock post at the northeast corner of lot 2 of section 15, west 1066 feet to a hemlock post at the intersection of the north line of lot 2 with the original boundary,

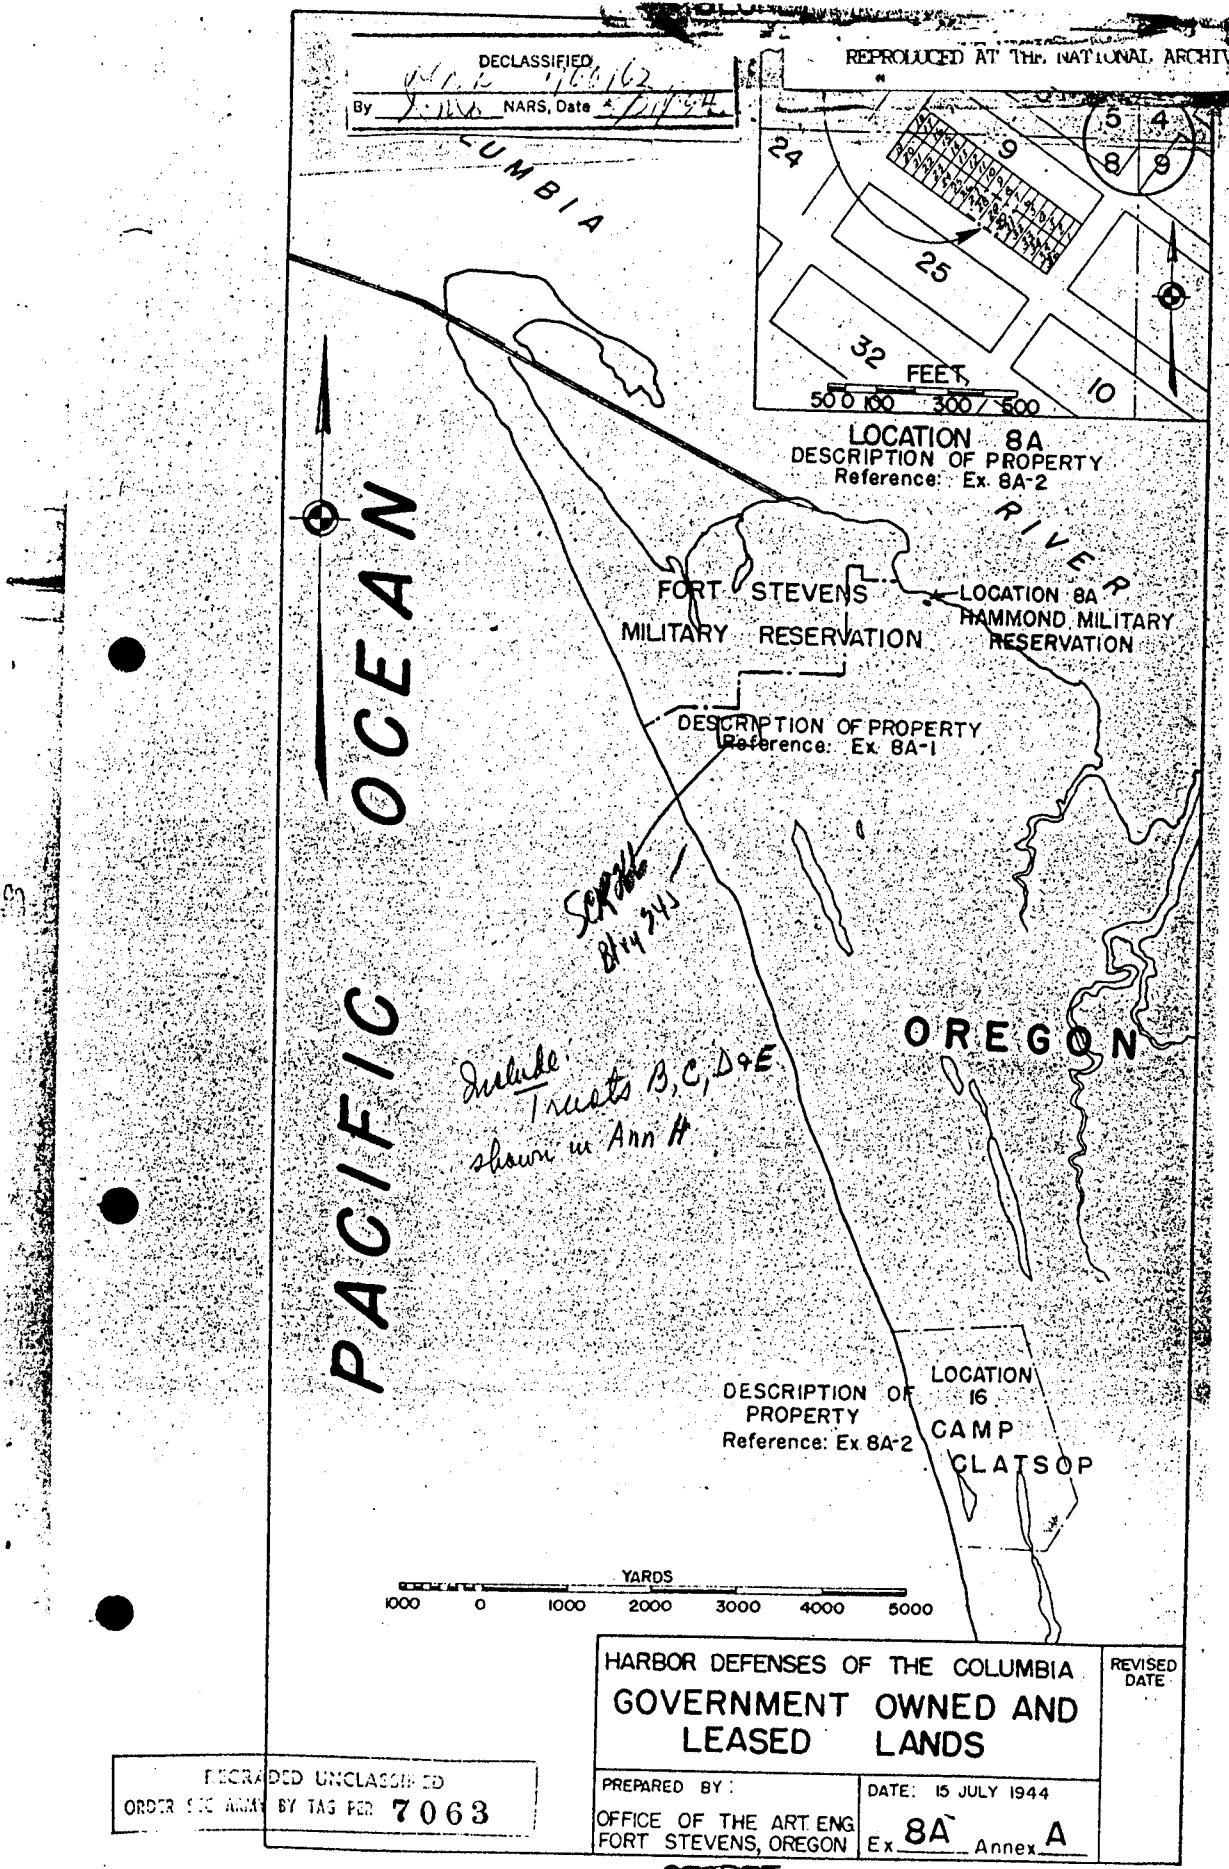

Thence N. $65^{\circ}30'$ W., 4427 feet along said original boundary to the point of beginning.

The tract as described contains an area of 729.35 acres.

HARBOR DEFENSES OF THE COLUMBIA

DESCRIPTION OF FORT COLUMBIA
MILITARY RESERVATION

Date: 2 June 1944 Exh 7-a-1

SECRET

DESCRIPTION OF FORT STEVENS MILITARY RESERVATION

That tract of land situated on Point Adams and Clatsop Spit, in Township 8 North, Range 10 West, and Townships 8 and 9 North, Range 11 West of the Willamette Meridian, in Clatsop County, State of Oregon, the boundary of which is more fully described as follows:

Beginning at the southeast corner of the reservation, from which the bearing and distance to the east quarter corner of Section 7, Township 8 North, Range 10 West, is due west, 1,201 feet, and running thence:

- (1) Due west, three thousand eight hundred and forty-one (3,841) feet, to the northeast corner of lot 3, section 7; thence:
- (2) Due south, one thousand three hundred and twenty (1,320) feet, to the southeast corner of lot 3, section 7; thence:
- (3) Due west, two thousand eight hundred and seventy-five (2,875) feet, to a point; thence:
- (4) South sixty degrees west (S. 60° W.), one thousand four hundred, (1,400) feet, more or less, to the low water line of the Pacific Ocean; thence:
- (5) Northwesterly, sixteen thousand five hundred (16,500) feet, more or less, along said low water line of the Pacific Ocean, as it meanders, to the southerly side of a jetty; thence:
- (6) Westerly, eight thousand three hundred (8,300) feet, more or less, along said southerly side of a jetty, to the mouth of the Columbia River; thence:
- (7) Easterly and southeasterly, forty-one thousand five hundred (41,500) feet, more or less, along the low water line of the Columbia River, as it meanders, to a point from which the bearing and distance to the northwest corner of the B. C. Kindred Donation Land Claim, as originally fixed by the government survey, is S. 53° W., 2,000 feet, more or less; thence:
- (8) N. 53° E., 360 feet, more or less, to an intersection with the pier head line as established in the Columbia River; thence:
- (9) Southeasterly tracing the pier head line as established in the Columbia River to the northwest corner of that certain tract of land deeded to the United States Treasury Department for the U. S. Coast Guard Service and of record in Book 12, Pages 310 and 311 of the Deed Records of Clatsop County, Oregon; thence:
- (10) Tracing the west boundary of said certain tract to an intersection with the north boundary of Ramie Avenue in the first addition of Kindred Park addition, a legal addition in Clatsop County, Oregon, produced easterly; thence:
- (11) Westerly tracing the north boundary of said Ramie Avenue produced, and Ramie Avenue to an intersection with the east boundary of River Street in said first addition to Kindred Park; thence:

~~SECRET~~

~~SECRET~~ANNEX B - FIRE CONTROL1. GENERAL

a. The inaccuracy of plotting equipment where the angle of intersection of less than 15° is encountered has been considerably reduced under the modernization project by the construction of multiple base lines. They extend from Location 1 on the Long Beach Peninsula in Washington to Location 17, east of Camp Clatsop, Oregon. All sectors of the fields of fire can be accurately plotted on the plotting boards.

b. Axial spotting at long ranges from the battery location (Const.) #245 cannot be accurately determined because of the low height of site of the battery. This condition will not prevail at Battery (Const.) #246 and #247 as the height of site of the battery and/or the spotting station is sufficient. Bi-lateral spotting for all batteries can be accurately determined from any or all baselines or combinations of baselines.

c. Observing and spotting is dependent upon visibility. Weather conditions in this locality are extremely variable during all seasons of the year. From local meteorological data during the past five (5) years the following information has been obtained which directly affects visibility:

Rainy days - 50.0%
Cloudy days - 30.6%
Clear days - 19.4%

During the winter seasons high winds of gale proportions are frequent. This condition causes heavy breakers and rollers which, with the normal southwest or northwest swell, renders spotting extremely difficult due to white water obscuring the splash. The rough water causes a variable error in vertical base position finding because of the inability to obtain precise water lining of the target. Fog conditions and low cloud banks during several months of the year will obscure visibility from certain base and stations. However, through the medium of the multiple base lines and the varying height of sites of the stations, it is anticipated that observation at effective ranges can be obtained a greater part of the time. Where visibility cannot be obtained, and during hours of darkness, radar data will be available for all batteries.

d. The high ground at Fort Canby and Fort Columbia provides adequate height of site for accurate position finding by either vertical or horizontal base methods. At Fort Stevens the ground is low and at no point exceeds 100 foot, except at Location 17, east of Camp Clatsop. This will necessitate the use of horizontal base methods with all base lines located on the south side of the Columbia River. Base lines terminating at Location 17, however, can use vertical base from that station.

e. Terrain conditions at Fort Canby are very favorable for the installation of radar equipment as the high headlands are precipitous and provide excellent height of site, minimum of mask, and maximum coverage of the ocean water areas, and the entrance to the Columbia River. The Surface Craft Detector, SCR-296A, for Battery (Const.) #247, is installed on Cape Disappointment at Location 3A. A second SCR-296A is installed on North Head for Battery (Const.) #246 and a General Surveillance Detector, SCR-682, will be installed at this same point (Location 2). The third SCR-296A, for Battery (Const.) #245, is installed at Fort Stevens at Location 14. Terrain conditions at Fort Stevens are not as favorable because of lower

APPENDIX B - FIRE CONTROL
(Continued)

1. GENERAL (Contd.)

Operations.

- f. (1) The standard method of fire control to be established for these Harbor Defenses upon completion of the modernization project will be the normal horizontal base method, using Case II pointing. With the provision of multiple baselines it is believed that the use of emergency methods will be remote except in the event of communication failure or obscurity of the target because of poor visibility.
 - (2) Emergency methods of fire control will consist of using radar data, with Case II pointing when possible, otherwise Case III pointing. Single station vertical base methods are available to each battery and will be used as the situation demands.
 - (3) A third emergency method is being promulgated whereby a central Harbor Defense directing point will be established for each radar location, and flank and center DPF. Data from any one of the directing points will be supplied to the batteries direct and relocated on the respective plotting boards.
- g. (1) Close coordination with the Navy and Coast Guard is maintained in the joint operation of the Harbor Entrance Control Post and for fire control of the challenge and examination anchorage batteries.
 - (2) Coordination with the Air Corps for observation or reconnaissance aviation is maintained through Headquarters, Western Defense Command, through the Commanding General, Northwestern Sector, Western Defense Command. In view of the fact that no antiaircraft artillery units are assigned or attached to these Harbor Defenses, the exchange of liaison officers is not established. Harbor Defense automatic weapons and the Anti-aircraft guns of the MTB batteries conform to the operational instructions issued by Hq., Fourth Air Force, particularly in firing on hostile aircraft and coordination of firing. Aviation missions for training purposes are available to the Harbor Defenses and coordinated through Headquarters, Northwestern Sector, Western Defense Command.
- h. Facilities for naval operations are established for the Navy in the Harbor Entrance Control Post. A section of the Harbor Defense transmitter room is utilized by the Navy for its radio and auxiliary power equipment. Army T/O type quarters are provided for Navy officers and enlisted personnel.

ANNEX B - FIRE CONTROL
(Continued)

2. ORIENTATION DATA.

a. The origin of the local plane coordinate system of these Harbor Defenses is the Cape Disappointment Light on the Fort Canby Military Reservation. The central meridian, as the Y axis through the Cape Disappointment Light, is $124^{\circ}03'03.136''$ West Longitude; a perpendicular to the Y axis is the X axis at $46^{\circ}16'33.608''$ North Latitude. X and Y are zero (0-0) through that point of origin and other points are referred to as North, South, East, and West.

b. The geographical coordinates of the Cape Disappointment Light and triangulation station "Gun," Fort Stevens, having been accurately determined by the U. S. Engineers, are used as control points for verification data of other points. The line between these points becomes a common baseline that may be used as a comparison of three coordinate systems: local plane grid, geographic, and U. S. Progressive Military Grid System.

c. All orientation data, baselines, and local coordinates, used in these Harbor Defenses, including the coordinates of fire control stations, battery directing points, etc., under the local plane grid system were based on triangulation and computations established in 1911-1912. Successive surveys made by the U. S. Engineers have proven the computations to be accurate and are accepted and used as orientation data for the modernization program.

d. Mean sea level can be conveniently determined by a bench mark and triangulation station, known as "tank," on Clatsop Spit in line with the south jetty. It consists of a standard U. S. Engineer circular brass disc, three inches in diameter imbedded in concrete on the NW pedestal. Elevation above mean sea level: 29.53 feet.

e. Exhibit 1-B indicates the local plane coordinate system in effect.

NOTE: Light Bombproof "LBB" by construction,
Splinterproof "SB" by construction.

j. Bomb Proofing and Gas Proofing.

- (1) Except where indicated, none of the stations or facilities require bombproofing, splinterproofing, or gasproofing.

k. Fire Control Switchboard Rooms.

(1) Fort Stevens - Location 13.

A light bombproof reinforced earthcovered concrete structure which also contains the administrative system. Gasproofing has been completed. Tactical switchboards, BD-74, combination, are installed, or on hand to be installed, as follows:

1 each - A, B, C, H, and J,
1 each - BD-75,
2 each - BD-17.

The present structure provides space as follows:

Entrance room, which includes gasproofing equipment and gas-proof compartments.....13'x17'x9' high.

Administrative room, includes women's rest room (6'x8'x9' high) and latrine (4'x8'x9' high).....23'x15'x9' high.

Tactical room, which includes, Main switchboard room (35'x17'x9' high), Vice Chiefs office (8'x8'x9' high), Mens latrine (4'x8'x9' high), Storeroom (8'x8'x9' high), Workshop (8'x12'x9' high)....35'x25'x9' high.

Power Room,.....9'x13'x9' high.
Adjacent Storeroom.....4'6"x6'6"x9' high.

(2) Fort Camby - Location 4.

A heavy splinterproof reinforced earthcovered concrete structure which also contains the administrative system. Gasproofing has been completed for the structure. Tactical switchboards, BD-74, combination, are installed, or on hand to be installed, as follows:

EO 12758

ANNEX B - FIRE CONTROL
(Continued)

3. FIRE CONTROL ELEMENTS - OTHER THAN BATTERIES (Contd.)

- 1 each - B, C, H, and J,
- 1 each - BD-75,
- 1 each - BD-17.

The dimensions of the rooms are:

Operating Room.....18'x15'x9' high.
 Storage Battery Room.....4'x15'x9' high.
 Charging Room & Storeroom..4 $\frac{1}{2}$ 'x15'x9' high.
 Adjacent entrance room,
 which includes gasproof-
 ing equipment and gas-
 proof compartments.....11'6"x11'6"x8' high.

- (3) Fort Columbia - Location 8.
 A heavy splinterproof underground concrete structure which was constructed for a mine casement in 1901. Structure is adequate for requirements of the Modernization Program and gasproofing has been completed. No administrative board is located at Fort Columbia as the administrative requirements are met by the Fort Stevens Board. Tactical switchboards, BD-74, combination, are installed, or on hand to be installed, as follows:

- 1 each - B, C, and H,
- 1 each - BD-75,
- 1 each - BD-17.

The dimensions of the rooms are:

Operating Room, which
 includes, Mens latrine
 (3'4"x4'x6'10").....11'x19'10"x6'10" high.

Storage Battery Room.....4'x9'x6'10" high.
 Charging Room & Storeroom..9'x11'4"x6'10" high.

Adjacent entrance room,
 which includes gasproof-
 ing equipment and gas-
 proof compartments.....11'4"x10'6"x8' high.

- (4) Trunking is set up between the tactical boards and the administrative system. Commercial and tactical trunking to higher echelons is accomplished through the Fort Stevens Board.

4. POST TELEPHONE SYSTEM.

- a. The post telephone system consists of administrative switchboards at Fort Stevens and Fort Canby, together with associated equipment. Both switchboards are located in the same structures as the tactical boards of the respective forts. Trunking is established between the administrative and tactical boards in order that administrative pairs in the river cable can be utilized for fire control purposes in an emergency. Commercial trunking facilities for commercial toll calls and leased tactical circuits are accomplished through the Fort Stevens Board.

~~SECRET~~

EO 12958
S.M.

12 MAY 1958

~~SECRET~~ANNEX B - FIRE CONTROL
(Continued)4. POST TELEPHONE SYSTEM (Contd.)

b. The Fort Stevens board is a Western Electric, No. 605A, with four operating positions. It has an ultimate capacity of 1100 lines, and is at present equipped with 340 common battery lines, 10 ring down trunks, 15 central office trunks, and no long line equipment.

c. The Fort Canby board is a standard Kellogg with a present and ultimate capacity of 100 common battery lines and 10 universal trunks.

5. TELETYPE AND TELEGRAPH FACILITIES.

a. Teletype facilities consist of three machines:

- (1) One machine for general coverage (TFX) and is located in the radio-telegraph office in the Harbor Defense Headquarters Building. It is connected with the commercial teletype switchboard in Portland, Oregon.
- (2) One machine for operation on a leased tactical circuit within the Northwestern Sector, Western Defense Command, and terminates at the Headquarters of Northwestern Sector, Western Defense Command. The machine is located in the radio-telegraph office in the Harbor Defense Headquarters Building.
- (3) One machine located in the Harbor Entrance Control Post for operation on a leased tactical circuit between the Harbor Entrance Control Post and the Naval Station, Astoria, Oregon. Teletype communications to and from the Thirteenth Naval District are relayed through the Naval Station, Astoria, Oregon.

b. A telegraph circuit is established between the Western Union Telegraph Company, Portland, Oregon, and the radio-telegraph office, Harbor Defense Headquarters.

c. Teletype and telegraph circuit diagram is shown by Exhibit No. 2-B.

6. RADIO COMMUNICATION.a. Northwestern Sector Command Net.

- (1) Radio communication is established with Headquarters, Northwestern Sector, Western Defense Command, Northwestern Sector Mobile Forces, and the Harbor Defenses of Puget Sound by means of a radio BC-447 with a BC-779 receiver installed in the Harbor Defense Command Post. Frequencies of 4090 kc and 5545 kc have been assigned for this net.
- (2) An SCR-177 is installed in the Harbor Defense Command Post which functions as a secondary for the BC-447, lateral liaison with adjacent troops, and air-ground communication. The set is equipped to operate on frequencies between 1500 kc and 4500 kc. If required, this set can function in the Harbor Defense net.

~~SECRET~~

ER 12958
SM

12 May 1943

~~SECRET~~ANNEX B - FIRE CONTROL6. RADIO COMMUNICATION (Contd.)

- (3) A radio, 32RA Collins with Hammarlund Super-Pro Receiver is installed in the radio-telegraph office of the Harbor Defense Headquarters as an alternate for the BC-447 and SCR-177 and is capable of performing the requirements as indicated in 6a (1) and (2) above by adjustment of frequency ranges. The 32RA Collins is equipped to operate on frequencies between 1875 kc and 3075 kc.

b. Harbor Defense Nets.

- (1) A radio net for emergency fire control communication is established between the Harbor Defense Command Post (Net Control Station), the group stations, the Mine battery command station, and Battery No. 247, using the SCR-281-A operating on 1738 kc.
- (2) A radio net for mining operations is established using the SCR-281-A on a frequency of 1890 kc.
- (3) A joint Army-Navy frequency of 2240 kc is available for all SCR-281-A radios installed and is also authorized as a secondary mine command net.
- (4) The Coast Guard distress frequency of 2670 kc is available for all SCR-281-A radios, including those mine vessels which are radio equipped.
- (5) An emergency fire control net is established in Battery No. 247. One (1) SCR-808 is located at the battery and four (4) SCR-828's are located in four (4) base end stations.
- (6) Sixteen (16) radios SCR-536 are provided for a radio communication net within the mine flotilla, the Mine Planter, and the MC-M₄ Station for use during mining activities.

c. Radio Transmitter Room.

- (1) The radio transmitter station is located in the abandoned mine casemate at Location 10. The structure is heavy splinterproof by construction and is gasproofed.
- (2) Space in the transmitter room has been allotted to the Navy for installation of transmitters of navy radios located in the Harbor Entrance Control Post.

d. Radio nets are shown schematically by Exhibit 3-B.

REFINATED UNCLASSIFIED
ORDER BY DATE OF EXP. FOR 7063

~~SECRET~~ANNEX C - SEACOAST SEARCHLIGHTS1. GENERAL.

a. Searchlight efficiency in this locality is greatly reduced because of adverse visibility conditions which prevail throughout the year.

b. Beach formations on the south side of the river, and the river area, require the lights to be emplaced considerable distance inland to take advantage of heights of site sufficient to clear the varied sand dunes on the beaches. The fixed lights on the north side of the river only are raised on towers to afford additional height of site. The wide dispersion of the lights renders central control impracticable.

c. Initial control of lights is under the direction of the Harbor Defense Commander from the Searchlight Command Post located in HDCP-OP. When lights are released to groups or batteries, direction and control becomes the responsibility of the commander concerned.

2. ASSIGNMENT OF SEARCHLIGHTS.

a. The following tabulation indicates the assignment of searchlights, by tactical number to groups, and the batteries for which the fields of fire can be illuminated. Location and fields of illumination are indicated on Exhibit 1-C.

Tactical No. of S/L	Normal Group Assignment	Illumination For
1	Group I	Btry #1

REFRAGED UNCLASSIFIED

ORDER BY TAG NO. 7063

12MAY45

~~SECRET~~ANNEX D - UNDERWATER DEFENSE1. AUTHORITY.

a. Original Buoyant Project - Reference Annex A, paragraph 1c (1).

b. Conversion to Ground Mine Project - Reference Annex A, paragraph 1c (2) and (3).

2. CONTROLLED SUBMARINE MINE PROJECT.

a. Underwater Portion of Defense (Exhibit 1-D):

- (1) The controlled submarine mine field consists of twelve (12) groups of thirteen (13) M-4 ground mines each.
- (2) The project is planted in three (3) lines of four (4) groups each. The lines are spaced approximately 800 yards apart with a one hundred fifty (150) foot interval between mines.
- (3) The following tabulation is the average submergence of each group referred to mean low water:

Group Number	Submergence
1	30 ft.
2	53 ft.
3	58 ft.
4	35 ft.
5	35 ft.
6	38 ft.
7	60 ft.
8	28 ft.
9	32 ft.
10	41 ft.
11	32 ft.
12	63 ft.

- (4) The single conductor cables are routed from the distribution boxes of the three (3) lines of mines to three (3) cable huts located on Sand Island. Two (2) seven-conductor cables connect the three (3) cable huts to the shore installation located at Fort Columbia. See Exhibit No. 1-D.
- (5) The project includes four (4) concrete cable huts to facilitate the routing of the submarine mine cables. Three huts are located on the easterly end of Sand Island, the fourth hut is constructed at the water's edge of the rock knoll at Chinook Point, Fort Columbia, and ties the mine field into the casemate.
- (6) The Audio Reception System, M-1, is installed seaward from the front line of mines. The Navy has no sound ranging equipment, underwater listening devices, or net and boom defenses in the Columbia River, or approaches thereto.

ANNEX D - UNDERWATER DEFENSE
(Continued)

b. Submarine Mine Flotilla.

The vessels indicated below are assigned to the submarine mine flotilla for controlled submarine mine work. These vessels are fully capable of performing the various functions of submarine mine operations. All vessels listed are required due to the excessive maintenance caused during spring and winter months as a result of rough water, high wind velocities, and storm conditions prevailing during these seasons.

	<u>Vessel</u>	<u>Length</u>	<u>Beam</u>	<u>Draft</u>	<u>Authority</u>
(1)	Mine Planter USAMP #7	188'	37'	11'	Letter, OCT, file 565.4H, MP-7, dated 12 Nov 42.

	J-799	32'	9'6"	2'6"	J-799, dated 8 Aug 42.

c. The FB-535, a ninety-eight (98) foot diesel powered boat, is now being used to provide ferry service between Fort Stevens and Fort Canby. This boat was used for planting activities prior to receipt of the USAMP #7 and the equipment necessary to convert it back to an auxiliary mine planter is maintained in local storage.

3. REQUIRED SHORE FACILITIES FOR SUBMARINE MINE PURPOSES.a. Wharves. - Exhibit No. 2-D.(1) Mine Wharf - Location 11.

Used for mine material and capable of berthing the mine planter and one DB boat for loading operations only. An open dock on the Columbia River is not suitable for permanent berthing of vessels.

(2) Boat Dock - Location 11.

A newly constructed wood piling dock, 300 feet long, capable of berthing two DB boats, two harbor boats, and several yawls or similiar size boats. This dock is protected by a breakwater and is satisfactory for permanent berthing.

~~SECRET~~

12M2445

~~SECRET~~

ANNEX D - UNDERWATER DEFENSE
 (Continued)

b. Boathouses and Small Boat Basin. - Exhibit No. 2-D.

(1) Boathouse - Location 11.

An existing wood frame corrugated iron structure, located at the land end of the mine wharf. Shelter for four mine yawls is provided.

(2) Small Boat Basin - Location 11.

Adjoins the new mine storeroom with a boat ramp and narrow (3') gauge railway which extends from a minus four feet MLW to a piling supported dock built adjacent to the mine storeroom. The basin includes 5 landing floats, each 10' x 40'.

c. Mine Loading Room. - Exhibit No. 2-D.

A new reinforced concrete structure at Location 11. Inside dimensions: 42' x 25' x 18' high, with an adjoining section 25' x 25' x 10' high. The structure contains necessary heavy duty equipment for handling ground mines and is satisfactory except that it does not meet the quantity distant table requirements.

d. Mine Storehouses. - Exhibit No. 2-D.

(1) Mine Storeroom No. 1 - Location 13.

A reinforced concrete structure 127' x 40' with overhead crane facilities and "run in" narrow gauge (3') railway connecting to the mine loading room and mine wharf.

(2) Mine Storeroom No. 2 - Location 11.

A new wood frame structure on piling foundation adjoining the small boat basin. Inside dimensions: 39' x 131' x 19' high which includes an office inside the structure, 19' x 14' x 8' high.

(3) Cable Tank House - Location 13.

A wood frame, corrugated iron siding, structure 146' x 20' containing three cable tanks; two each 17'7" x 36'2" x 6', and one 17'6" x 22'2" x 7'3". It is adequate and satisfactory.

e. Explosive Storage Magazines. - Exhibit No. 2-D.

Two (2) reinforced concrete earth-covered, igloo-type structures at Location 12. Inside dimensions: 17' x 26' x 8' high. These structures have a total capacity of 143,000 pounds of TNT which is adequate for the "30% overage" of approximately 140,000 pounds required for the approved ground type project. Fuze are stored in abandoned Battery Smur at Location 10. The storage plan complies with the provisions of TM 9-1900.

f. Mine Casemate. - Exhibit No. 3-D.

An adequate reinforced, concrete, earth-covered, bomb-proof and gasproof structure, defiladed behind the rocky knoll at Chinook Point at Location 8. The inside dimensions of the structure are 32' x 50' x 10' high and include the operating room, gasproof equipment and gasproof compartments, latrine, power generator room, and storerooms. Fourteen (14) control panels are installed, or on hand to be installed. Two (2) panels are spares.

~~SECRET~~

ANNEX D - UNDERWATER DEFENSE
 (Continued)

g. Mine Plotting Room. - Exhibit No. 3-D.

An existing concrete dug-in structure located in the lower level of Station MC-M₄¹ at Location 7. Reference: Paragraph 8d (6), Annex B.

7d.(8)

h. Mine Group and Battery Command Stations.

(1) Mine Group Station - Location 5.

Located on Cape Disappointment in an existing concrete structure. Reference: Paragraph 3e (1), 3 C. Annex B. This site provides a controlling field of view of the mine field and all approaches thereto.

(2) Mine Battery Command Station - Location 7.

Located in MC-M₄¹.

i. Mine Observation Stations.

Reference: Paragraph 8d, Annex B, and Exhibit 13-B, 2-D, 3-D, and 4-D.

7d.

4. MINE FIELD PROTECTION.

a. Two AMTB Batteries, Tactical No. 2 and No. 6, are directly under the control of the Mine Group Commander. Their fields of fire as well as that of two 6" BC gun batteries, Tactical No. 3 and No. 5, can cover all water areas in the mine field and approaches thereto. See Exhibit 3-A and 4-A.

b. The following numbered searchlights are located to provide illumination over the mine field and approaches thereto: Nos. 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 17.

5. STORAGE OF EXPLOSIVES.

a. All TNT used in mine field operations is stored in the concrete igloo-type structures referred to in paragraph 3e above.

b. The igloos are situated beyond minimum quantity-distance table requirements of any inhabited building and meet the requirements of TM 9-1900.

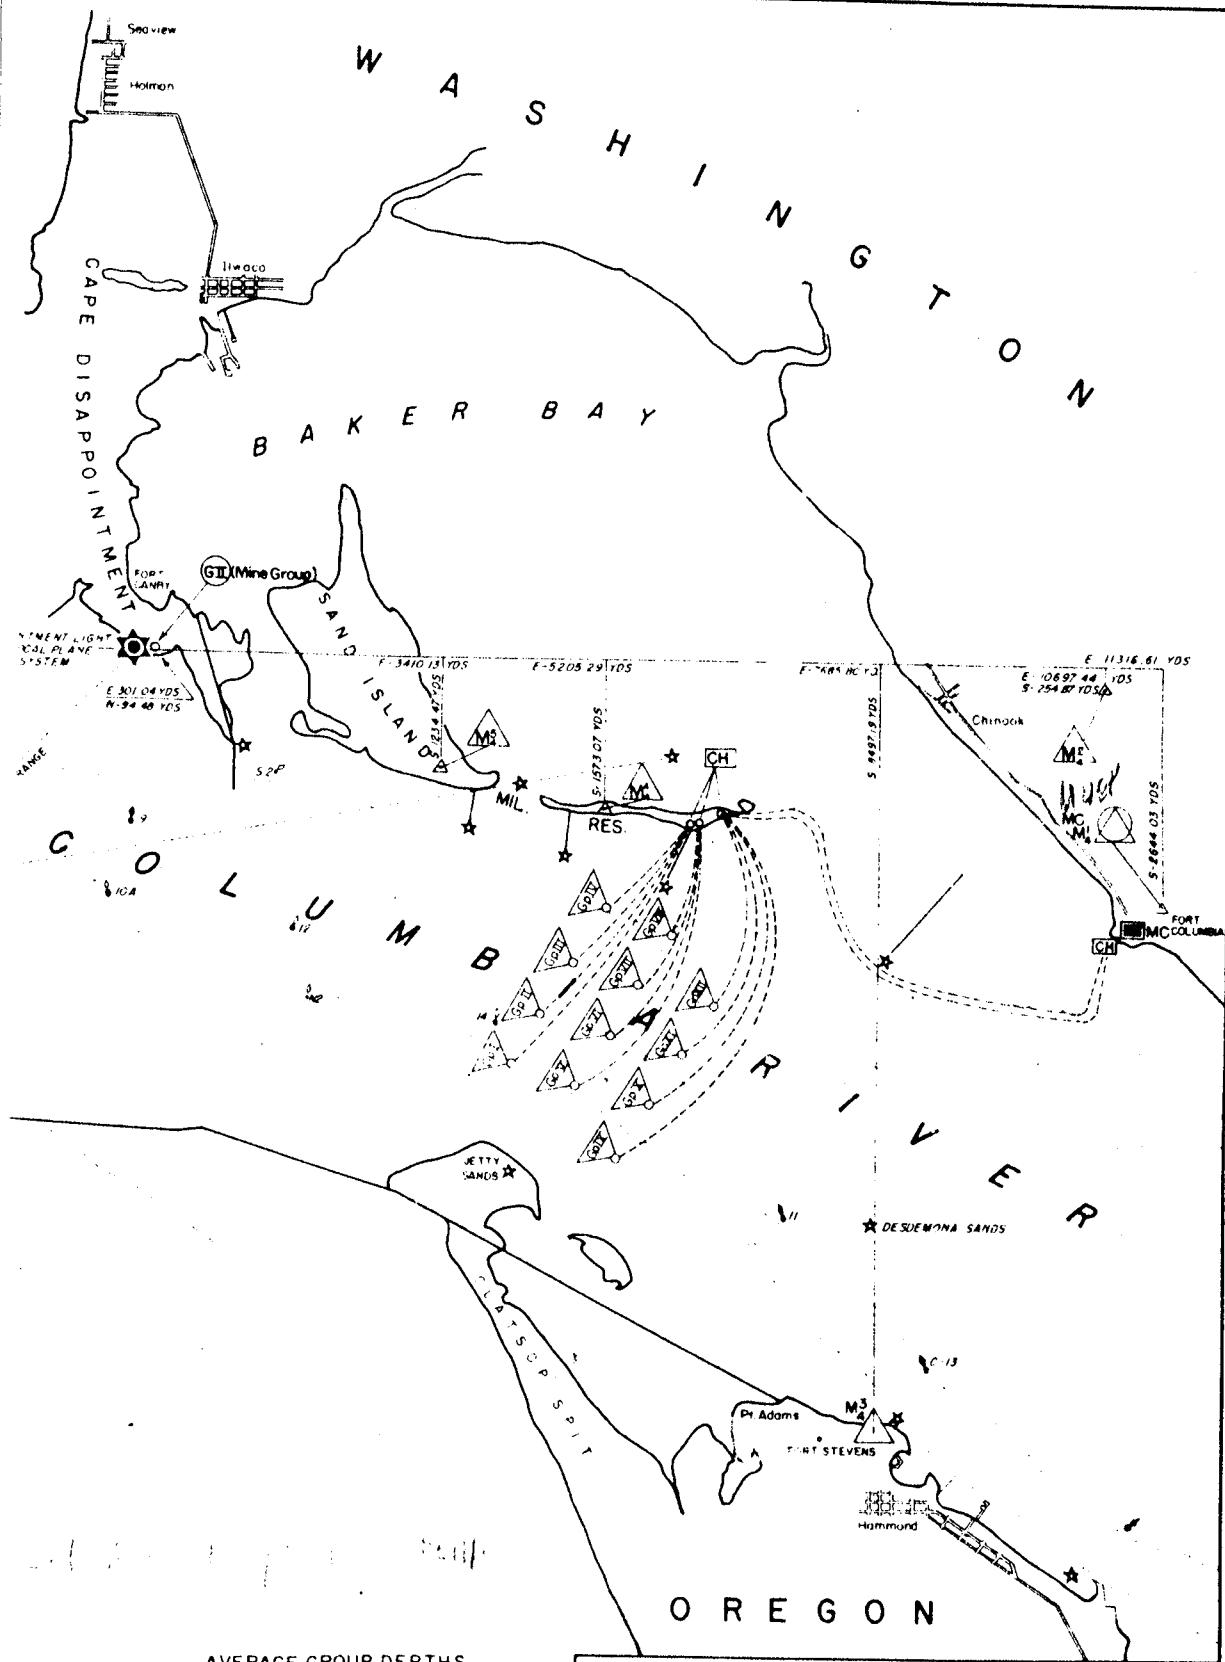

c. Fuze are storod separately from all TNT in an abandoned battery emplacement.

6. LAND REQUIREMENTS.

a. None.

REFRACED UNCLAS
ORDER SEE FORM IN THIS FILE
7063

~~SECRET~~ANNEX E - ANTLAIRCRAFT ARTILLERY (HD)1. ORGANIZATION.

a. No organic or attached antiaircraft artillery organizations are assigned to those Harbor Defenses. Batteries No. 2 and No. 6 (AMTB) have a secondary mission of antiaircraft defense.

2. OPERATIONAL CONTROL.

a. AMTB armament, ~~except automatic weapons~~, when released for antiaircraft defense is under the operational control of the Fourth Air Force. Automatic weapons provided for the close-in defense of installations are under the tactical control of the Harbor Defense Commander. Liaison with the Fourth Air Force is established through the Harbor Defense Command Post and the Joint Operations Center, Seattle, Washington, over the tactical telephone net. Neither AAAIS or AWS systems affect the project.

b. With the total automatic weapons indicated in paragraph 3c, it is estimated that the following mobile antiaircraft units will be required to provide a minimum antiaircraft defense for those Harbor Defenses against hostile aircraft. **IN THE EVENT A HIGHER CATEGORY OF DEFENSE IS APPROVED:**

(1) Two (2) mobile, 90mm. AA ~~separate~~ battalions.

(2) Four (4) mobile, AA batteries.

3. ANTLAIRCRAFT EQUIPMENT.

a. Gun defense - Includes four (4) 90mm. AA mobile and four (4) 90mm. AA fixed guns and one (1) SCR-547 Radar unit. Primary mission AMTB, secondary mission AA. Authority: Reference paragraph 1c, Annex A, and Secret Radio No. 4702, dated 3 February 1944, from Commanding General, Army Service Forces, to Commanding General, Western Defense Command.

b. Searchlight, radar equipment, and sound locator defense - None authorized in project for AA defense. Six (6) portable searchlights are located in positions applicable for both seacoast and antiaircraft defense, but would be ineffective against aircraft without radar or sound locators.

c. Automatic weapons defense - Will consist of the following when all armament approved for these Harbor Defenses is received:

No.	Type	Authority
12	40mm AA Guns	Paragraph 1a(3), Annex A (Includes T/BA allowance of 6 guns for 3-6" gun batteries.)
4	37mm AA Guns	Paragraph 1a(1), Annex A (2 each per AMTB Battery.)
12	Cal..50 AA M/G	Paragraph 1a(3), Annex A (Includes T/BA allowance of 6 guns for 3-6" gun batteries.)
8	Cal..50 AA M/G	Paragraph 1a(1), Annex A (4 each per AMTB Battery.)
2	Cal..50 AA M/G T/BA	No. 4, 1 July 1942 (2 each per USAMP.)

Total: 12 - 40mm AA Guns,
4 - 37mm AA Guns,
22 - Cal..50 AA Machine Guns, WC.

ANNEX E - ANTI AIRCRAFT ARTILLERY (HD)

3. ANTI AIRCRAFT EQUIPMENT (Contd.)

d. Antiaircraft Artillery Intelligence Service - None provided in project.

e. Fire Control Telephone Net - The approved seacoast artillery fire control net is not adequate for estimated requirements of supporting antiaircraft units. However, it is assumed that such units will be equipped to provide organic communications to fulfill their mission with the aid of a minimum number of pairs in the cross-river cable.

f. Radio Net - None provided for AA defonso.

g. All antiaircraft weapons are stored at automatic weapon emplacements except Cal..50 machine guns not required to be emplaced under Category of Defonso "A," JAAN; these are maintained at gun emplacements of armament to which assigned. Status of antiaircraft weapons and major items of fire control equipment is as follows:

Btry No.	Typo Btry	Armament and Equipment Auth		Armament and Equipment on Hand		Equipment Short	Location & Field of Fire
