

Fort Stevens, Oregon

By Authority of : C.O., HD. of the Columbia

Proceedings of a Local Board of Officers convened pursuant to

paragraph ld, AR 100-20, by letter, Headquarters, Ninth Corps Area, Presidio of San Francisco, California, Secret /64, HD Projects, February 24, 1941, for the purpose of recommending the details of installation of defensive elements within the Harbor Defenses of the Columbia.

Inclosure No. 1 to letter, subject "Local Board Proceedings, Harbor Defenses of the Columbia" dated Headquarters, Harbor Defenses of the Columbia, January 17, 1942.

SECTION "GENERAL"

# TABLE OF CONTENTS

Proceedings of the Local Board, Harbor Defenses of the Columbia.

| Section "General"                         | Par. 1 to 3 inclusive   |
|---|-------------------------|
| Section "A" - Seacoast Artillery          |                         |
| Agation "B" - Fire Control                | Par. 13 to 20 inclusive |
| Section "C" - Seacoast Searchlights       | Para 21 to 24 inclusive |
| Section "D" - Underwater Defenses         |                         |
| Section "E" - Antiaircraft Artillery      |                         |
| Section "F" - Supporting Aircraft         |                         |
| Section "G" - Gas Defense                 | Par. 34 to 35 inclusive |
| Section "H" - Summary of Land Procurement | Par. 36                 |

#### MEMBERS OF THE BOARD

Colonel Robert P. Glassburn, Coast Artillery Corps.

Lieutenant Colonel C. R. Moore, Corps of Engineers, (District

Engineer, Portland, Oregon.)

Lieutenant Colonel Morris E. Conable, Coast Artillery Corps.

Major Porter T. Gregory, Coast Artillery Corps.

Captain P. Francis Passarella, Coast Artillery Corps.

Colonel Robert P. Glassburn, Coast Artillery Corps, was relieved by Colonel Kelley B. Lemmon, Coast Artillery Corps, by letter, Office Commanding General, Ninth Corps Area, Secret /64, HD. Projects, May 1, 1941.

Colonel Kelley B. Lemmon, Coast Artillery Corps, was relieved by Colonel Clifton M. Irwin, 249th Coast Artillery and Captain P. Francis Passarella, 18th Coast Artillery, was relieved by Major Charles J. Olvis, 249th Coast Artillery, by letter, Office Commanding General, Ninth Corps Area, Secret /64 HD. Projects, October 20, 1941.

Lieutenant Colonel Morris E. Conable, Coast Artillery Corps, was relieved by Lieutenant Colonel K. Rowntree, 18th Coast Artillery, by letter, Office Commanding General, Ninth Corps Area, Secret /64, HD. Projects, November 18, 1941.

- 1. The board met March 5, 1941, and on succeeding days thereafter until January 17, 1942. All of the members of the board were present.
- 2. The board studied the existing approved Basic Project, the innexes to the Harbor Defense Projects, Harbor Defenses of the Columbia, current official manuals pertaining to harbor defense installations and the following listed correspondence:
  - a. Letter: Adjutant General's Office, August 29, 1939. Subject: Tactics and Technique of Antiaircraft Artillery, Automatic Weapons, AG 472.91 (8-9-39) (Misc) C-M, To all Corps Area and Department Commanders.
  - b. Pamphlet: Notes on Characteristics and Employment of Depression Position Finders, Office Chief of Coast Artillery, published September 6, 1940.
  - c. Letter: Adjutant General's Office, September 26, 1940. Subject: Modernization of Harbor Defense Projects, Continental United States, AG 660.2 (9-16-40) M-WPD-M, To Commanding General, Ninth Corps Area, with ten (10) inclosures.
  - d. Letter: Adjutant General's Office, October 2, 1939.

    Subject: Project Requirements for Antiaircraft 37mm Guns and Machine Guns, AG 472.91 (8-2-39) M-WPD, To Commanding General, Ninth Corps Area.
  - e. Letter: Adjutant General's Office. October 24, 1940. Subject: Modernization of Harbor Defense Projects, Continental United States, AG 660.2 (10-13-49) M-OCCA-M, To Octamending General, Ninth Corps Area.

Section General, Page 2.

4660

- f. Pamphlet: Instructions and outline for preparation of Annexes to Harbor Defense Projects in the Continental United States, Office Chief of Coast Artillery, dated November 12, 1940.
- g. Letter: Headquarters, Harbor Defenses of the Columbia, November 13, 1940. Subject: Program for Expenditure, Seacoast Defense Funds, 7x 660, Secret, To Commanding General, Ninth Coast Artillery District with eleven (11) indorsements, file AG 660 (11-13-40) M.
- h. Letter: Adjutant General's Office, January 18, 1941. Subject: Revision of Annexes to Harbor Defense Projects, AG 660.2 (1-15-41) M, To Commanding General, Ninth Corps Area.
- i. Letter: Office Chief of Coast Artillery, January 29, 1941. Subject: Plans for Storage of Seacoast Artillery Ammunition (Continental United States) with two (2) inclosures, approved by 3rd indorsement, AG 471.88 (1-29-41) M-WPD.
- j. Letter: Office of the Signal Officer, Headquarters Fourth Army, February 15, 1941. Subject: Assignment of Tactical Radio Frequencies, 676.3 Freq. (Sig.), To Commanding Officer, Harbor Defenses of the Columbia, with three (3) inclosures.
- k. Letter: Office Chief of Coast Artillery, February 20, 1941. Subject: Local Board Action, Harbor Defense Modernization Program (Continental United States) 662.1/AK, To Commanding Officer, Harbor Defenses of the Columbia.
- 1. Pamphlet: A Guide for Preparation of Local Board Proceedings, Par. 1d, AR 100-20. Office Chief of Coast Artillery, dated February 20, 1941.
- $$\rm{m}_{\raisebox{-.5ex}{$\scriptscriptstyle \bullet$}}$$  Pamphlet: Notes on Type Harbor Defense Installations, Office Chief of Coast Artillery.
- n. Letter: Office Commanding General Ninth Corps Area, Secret /64 HD. Projects, February 24, 1941. Subject: Board of Officers (Local Board) To Commanding Officer, Harbor Defenses of the Columbia.
- o. Letter: Office Commanding General, Ninth Coast Artillery District, March 3, 1941. Subject: Revision of Annexes to Harbor Defenso Projects, Secret, 660.2 (Revisions, HD. Annexes), To Commanding Officer, Harbor Defenses of the Columbia.
- p. Letter: Office Chief of Coast Artillery, Secret, March 7, 1941. Subject: Battery Russell, Fort Stevens, Oregon, To The Adjutant General, with twenty-one (21) indorsements.
- q. Letter: Office Chief of Coast Artillery, Secret, April 17, 1941. Subject: Expenditure Program, Seacoast Defense Funds, 1941, To Commanding General, Western Defense Command.
- r. Letter: Office Commanding General, Ninth Corps Area, May 1, 1941. Subject: Board of Officers (Local Board), Secret /64 HD. Projects, To Commanding Officer, Harbor Defenses of the Columbia.
- s. Modernization of Harbor Defense Projects, Site Board Proceedings for the Harbor Defenses of the Columbia, with twenty-one (21) indorsements. Approved by the Secretary of War by 6th indorsement, dated February 4, 1941, file AG 660.2 (11-4-40) M-WPD and 18th indorsement, dated June 10, 1941, file AG 660.2 (11-4-40) MC-E.

SECRET

t. Letter: Office Quartermaster General, W. D., Washington, D. C., September 3, 1941. Subject: Acquisition of land, Q.M. 601-1 C-RE, To Zone Constructing Q. M., Zone IX, San Francisco, California.

u. Letter: Office Commanding General, Ninth Corps Area, Secret /64 HD. Projects, October 20, 1941. Subject: Esard of Officers (Local Board) To Commanding Officer, Harbor Defenses of the Columbia.

v. Letter, Office Commanding General Ninth Corps Area, Secret /64 HD. Projects, November 18, 1941. Subject: Board of Officers (Local Board) To Commanding Officer, Harbor Defenses of the Columbia.

3. The board made a complete and detailed inspection of the existing defensive installations and of the approved sites for the projected installations and, after consideration of all the factors involved, unanimously agrees in recommending that the defensive elements as stated herein be authorized for inclusion in the next revision of the Annexes to the Harbor Defense Project, Harbor Defenses of the Columbia.

#### a. Camouflage.

In order that the three (3) new six-inch project batteries may be properly camouflaged, the cost estimates appearing in Exhibit A-7 include the sum of \$1,500 per battery.

#### b. Local Ground Defenses.

In order to carry out the Harbor Defense plan for Local Ground Defense, the board recommends the following arms be supplied. These are in addition to those authorized or provided for antiaircraft defense.

| Location                                    |        | 30 caliber<br>Machine Guns | Automatic<br>Rifles |

a. Or other designation of location.

b. General location map.

c. TC - to be constructed.

5. Sites for the following batteries (to be constructed) have been approved by the Secretary of War.

BATTERIES "UNDER CONSTRUCTION" and "TO BE CONSTRUCTED"

| Priority | Tactical<br>Number | (Battery) Name or Construction Number | Casemate<br>or Shield | Exhibit | Acreage | Estimated<br>Cost of<br>Land |
|----------|--------------------|---------------------------------------|-----------------------|---------|---------|------------------------------|
| 2        | 3                  | 245                                   | Shield                | A-2     | None    | None                         |
| 3        | 2                  | 246                                   | Shield                | A-3     | None    | None                         |
| 1        | 1                  | 247                                   | Shield                | A-4     | None    | None                         |

- a. Batteries "Under Construction" None.
- b. Batteries "To be Constructed" The site locations for batteries, Construction Numbers, 245, 246, and 247, have been approved by the Secretary of War. See reference letter paragraph 2s above.
- c. The board recommends that living facilities for four officers and ninety enlisted men be included in the battery structure of
  each of the three (3) six-inch batteries. These facilities, if provided within the battery structures themselves, will greatly add to
  the comfort, morale, and efficiency of the manning organization and
  it will decrease the camouflage and concealment problems, and it will
  also afford protection for gun crews during an air attack. Itxixxeetixxedxteat the recent experiences of the present war indicate that
  these facilities/be provided for these batteries.
  Should
- d. The board recommends that the six-inch guns be provided with a turret type caliber armor protection.
- 6. The following tabulation lists the existing seacoast batteries which have been classed as outmoded under the modernization program. Current plans contemplate their exclusion from the project upon completion of all new batteries.

 $\frac{S \to C R \to T}{A'', \text{ Page 2.}}$

<sup>\*</sup> See Note 2, par. 6.

a. Battery Mishler. The emplacement of this battery is in good condition and the guns and carriages are in very poor mechanical condition. The emplacement and magazines of this battery are to be used as the temporary HDCP and HECP.

 $\frac{S E \sqrt{R E T}}{Section/"A", Page 3.}$ 

Reference paragraph 2d (3), Appendix II, Part IV, Harbor Defense Projects. PUGET SOUND-COLUMBIA RIVER AREA. Short title CCA-P-PSCR.

# b. Battery Mcbile 12" Ry. Mortars.

The guns and materiel of this battery are in very good condition. This battery has been eliminated from project per reference letter Note 2, par. 6 above.

- 8. The tactical organization of the Harbor Defenses pending completion of the modernization program is shown on Exhibit A-5. The tactical organization of the Harbor Defenses recommended for adoption upon completion of the modernization program is shown on Exhibit A-5.
- 9. The following tabulation shows the War Reserve Allowance of Amnunition for all authorized seacoast batteries, including those to be abandoned on completion of the modernization program, together with the Battle Allowances of Ammunition approved for existing batteries and those recommended for new batteries.

| Name or<br>Const. | Tactical<br>Number | Number<br>of Guns | Caliber<br>and<br>Type | r<br>Type<br>Projectile   | Rounds  <br>War<br>Reserve | Battle<br>Allowance | Place<br>of<br>Storage                       |

| Pratt             | 9                  | 2                 | 6" DC<br>M1897M1       | 108 lb. AP<br>90 lb. HE   | 1200<br>400                | 1200<br>200         | Storage                                      |

10. In order to accommodate the battle allowances of ammunition recommended in paragraph 9, above, and those mentioned in paragraph 30, below, (for anciaircraft weapons), additional bomb-proof magazine storage capacity is required as follows:

 $\frac{S \to \emptyset R \to T}{Section "A", Page 4.}$ 

# a. New Project Batteries "To be Constructed"

One thousand (1000) rounds of AP and two hundred (200) rounds of HE for each of the new project batteries will be stored in the bomb-proof magazines of each battery.

The remaining four hundred rounds (200 rounds AP and 200 rounds HE) of the Battle Allowance for each new project battery will be stored in magazines of existing seacoast batteries, "No Longer Required". The present magazines of Batteries Lewis and Walker, located at Fort Stevens, Oregon, will be bomb-proofed and used for the storage of this ammunition. These magazines will be known as, and hereinafter will be referred to, the Harbor Defense Ammunition Storage Magazine. For Magazine Plan see Exhibit A-6. For location site see Exhibit B-1.

#### b. Existing Project Batteries.

Two (2) 12" Mortar Batteries, three (3) 6" DC and one (1) 10" DC gun batteries. No additional storage facilities are required for the storage of the Battle Allowance of ammunition for these batteries.

#### c. Antiaircraft Weapons.

The Harbor Defense Ammunition Storage Magazine, referred to in 10a above, will care for all the ammunition requirements for the antiaircraft automatic weapons.

- d. Magazine requirements for TNT storage for the mine project are covered in a later paragraph.
- 11. The ammunition storage plan proposed in the two preceding parabraphs has been checked against the requirements of TR 1370-A as changed by Chinges 1 to 7 and complies therewith in all respects except as follows:

The site location of Battery 246, Fort Columbia, is less than 600 feet from a public highway. The utilization of this site necessitates waiving the safety provisions of the quantity-distance tables appearing in TR 1370-A, C 1-7, relative to the storage of ammunition. However, the highway is amply barricaded as it goes through a tunnel and there is a high hill mass behind the magazine opening.

12. Attached hereto as Exhibit A-7 is the Cost Estimate and Priority Guide for the construction or procurement of items covered in the fortification construction items, major items of equipment for all services, as listed in Incl. No. 7 to letter, subject "Modernization of Harbor Defense Projects, Continental United States," dated the office of The Adjutant General, September 26, 1940, (AG 660.2, (9-16-40) M-WPD-M), and land procurement items. Estimated costs of land include cost of survey and transfer. Separate Cost Estimate and Priority Guide forms have been prepared for those items pertaining to the Fire Control, Searchlight, Antiaircraft, Underwater Defense and Gas Defense Annexes as indicated in succeeding paragraphs of these proceedings.

SECTION "B"

#### FIRE CONTROL

13. Following are brief paragraphs describing, and in justification of, command and fire control requirements for seacoast artillery, antiaircraft, and underwater defense elements pertaining to the Harbor Defenses of the Columbia, requirements originating in local defense plans and for which the Coast Artillery is responsible have been included. Maps and detailed location skytches showing these installations are referred to by Exhibit Number in each subparagraph. Land to be acquired is indicated in the subparagraph pertaining to each element. A general map showing all site locations and the eventual locations of all armament existing and projected after completion of the Modernization Program is shown on Exhibit B=1.

# 14. HARBOR DEFENSE. FORT GROUPMENT AND GROUP FIRE CONTROL REQUIRE-

Exhibit B-1). (Proposed) (Location No. 5.

The present temporary HDCP is housed in the magazines, galleries etc., of old Battery Mishler (Battery "no longer required") located at Fort Stevens, Oregon. It is splinter, fire and gas proofed and affords protection against light bombs only. It has no observation post as part of the command post. It also houses the HECP. This command post is only temporary, therefore, the board recommends the construction of a new Harbor Defense Command and Harbor Entrance Control Post at Fort Canby, Washington.

The proposed command post will be a one (1) level bomb and gas-proof reinforced concrete structure. The HDOP, which will be directly connected with the command post, will have an elevation of about 290 feet and will afford an excellent field of view over the entire field of fire of the existing and proposed batteries as well as upstream beyond Astoria.

For details of construction, layout plan and facilities afforded by structure, see Exhibit B-2.

For field of vision for HDOP see Exhibit B-4.

For cost estimate and priority guide see Exhibit B-3.

#### b. Fort Command Posts.

None recommended by the board as there are none contemplated in the tactical organization of the Harbor Defense.

#### c. Groupment Command Posts.

The artillery armament of the Harbor Defense after completion of the Modernization Program will consist of three (3) 6-inch batteries located one each at three (3) rather widely separated forts. Overlapping fields of fire necessitate fire direction by a group commander (Harbor Defense Commander) exercising such fire direction from the HDCP located at Fort Canby. A groupment Command Post is therefore unnecessary.

 $\frac{S \to C/R \to T}{Section/B", Page 2.}$ 

d. Group Command Posts.

None, same remarks as lic above apply.

e. Harbor Defense Radio Station.

The tactical radio sets required for use in the HDCP will be housed in the new structure proposed for that command post. The administrative sets will be housed in the old mine casemate located at Fort Stevens, Oregon.

f. Fort Radio Station.

None recommended.

- g. Harbor Defense Signal Station: To be a function of the Harbor Entrance Control Post.
  - h. Post and Fire Control Switchboard Rooms.

There are three (3) switchboard rooms in the Harbor Defenses, one at each of the forts.

(1) Fort Canby. (Existing) (Not adequate) (Location No. 4)

The Fort Canby switchboard room is a concrete structure located behind a hill about 1400 yards northeast of Canby Light and about 14 feet above MLW. This structure is to be gas and bomb-proofed. See Exhibit B-8.

(a) Dimensions of rooms:

Operating room 18' x 15' Storage Battery room 4' x 15' Dormitory 4' 6" x 15'

- (b) Equipment requirements: See Exhibit B-24.
- (c) Cable requirements: See Exhibits B-18; B-25.
- (2) Fort Columbia. (Existing) (Not adequate) (Location No. 8)

The Fort Columbia switchboard room is an underground concrete structure located about 30 yards west of No. 1 emplacement of Battery Murphy and about 65 feet above MLW. This structure is to gas and bomb-proofed. See Exhibit B-9.

(a) Dimensions of rocms:

Operating room 11' 6" x 15' Storage Battery room 4' x 7' Dormitory 11' 6" x 9'

- (b) Equipment requirements: See Exhibit B-24.
- (c) Cable requirements: See Exhibits B-18; B-25.
- No. 13) Fort Stevens. (Existing) (Not adequate) (Location

SECRET

Harbor Defenses of the Columbia

The Fort Stevens switchboard room is a reinforced concrete structure located about 230 yards east of Battery Clark and about 16 feet above MLW. This structure is to be gas and bomb-proofed. See Exhibit  $\underline{B-10}$ .

#### (a) Dimensions of rooms:

Operating room 18' x 15' Storage Battery room 4' x 15' Dormitory 4' 6" x 15'

15. BATTERY FIRE CONTROL REQUIREMENTS, NEW BATTERIES (BY BATTERY).

Following are brief subparagraphs describing, and in justification of, detailed command and fire control construction, equipment and land requirements for each new battery to be constructed.

a. Battery, Construction No. 245. Tactical No. 3 (Element of the Harbor Defense, Fort Stevens, Oregon). Location No. 9.

(1) This is a two (2) gun 6" BC Shield Battery located at Fort Stevens, Oregon, as indicated in Exhibits A-1; A-2; B-1; B-5.

(2) The fire control layout recommended is shown in the following tabulation and in the exhibits indicated.

 $\frac{S \to C/R \to T}{Section} = \frac{S}{R} + \frac{S}{R}$

The data as to azimuth and length tabulated in paragraph (3) above, was determined by local survey for existing stations and map approximations for new stations. Data not accurate.

16. BATTERY FIRE CONTROL REQUIREMENTS, EXISTING PERMANENT BATTERIES:

Following are brief subparagraphs describing, and in justification of, detailed command and fire control construction, equipment and land requirements to complete each existing battery designated to remain in the project after completion of the modernization program.

a. No existing SEACOAST ARTILLERY battery will remain in the project after completion of the modernization program.

b. Mine Battery, Tactical No. 4, (Element of the Harbor Defenses, Fort Columbia, Washington). Location No. 8.

 $\frac{S \to C/R \to T}{Section}$  Section "B", Page 10

E - Existing and Adequate Station

<sup>\*\*</sup> In addition to exhibits listed, see also Exhibit B-1.

<u>S E C R/E T</u>

Harbor Defenses of the Columbia

(1) The Mine Battery has installations located at Fort Stevens, Oregon, and Fort Columbia, Washington, as indicated on Exhibits B-1 and D-2.

(2) The fire control layout recommended is shown in the following tabulation and in the exhibits indicated.

| * Fire Control Station | **<br>Exhi-<br>bit | Loca-<br>tion<br>No. | Approx.<br>Coordi- Type of<br>nates Station | Approx.<br>H. I. &<br>Type | Combined<br>with<br>Stations | Ground<br>Elev. | Acreage<br>Required<br>Exhibits |

# 17. BATTERY FIRE CONTROL REQUIREMENTS, EXISTING OUTMODED BATTERIES.

There are NO command and fire control requirements to complete minimum essential elements of the existing batteries designated for abandonment upon completion of the modernization program.

#### 18. RADIO REQUIREMENTS:

The following subparagraphs and accompanying exhibits describe the radio communication system pertaining to all elements of the Harbor Defense.

$$\frac{S \to \sqrt{R \to T}}{Section "B", Page 14}$$

- a. Higher Authority Net. The radio communications between the Harbor Defense Command Post and installations of higher authority can be adequately provided for with one SCR 32 RA now on hand.
- b. Harbor Defense Command Net. A command net utilizing SCR 281 A sets, one at the HDCP and one at each battery BC and one for the mine planter will be used for radio communication between all command elements of the Harbor Defense. Six SCR 281 A sets are required and six are now on hand.
- c. Mine Command Net. A separate net will be required for the Mine Command during planting and maintaining the mine fields. Five (5) SCR 281 A sets will operate in this net. One (1) for the Mine Planter, one (1) at the Mine Command Station at Fort Columbia, one (1) at the alternate Mine Command Station at Fort Stevens, and one (1) each for DB Boats L-64 and L-75. Two (2) of these sets are provided for under paragraph 18b above. Three (3) additional sets are required.

# d. Exhibits.

- (1) For radio nets see Exhibit B-16.
- (2) For cost estimate see Exhibit B-24.

#### 19. COMMUNICATION REQUIREMENTS:

- a. Basis for pairs needed for installations within the Harbor Defense:
  - 1 pair post telephone to each installation.
  - 3 pairs battery to each base end station.
  - 1 pair T. I. Bell Circuit.
  - 3 pairs BC and EBC to HDCP.
  - 1 pair to each SCSL.
  - 1 pair AAOP to HDCP.
  - 1 pair land defense OP to HDCP.
  - 2 pairs HDCP to Sub-sector.
- b. In addition to the cable needs of the Harbor Defenses the following pairs will be required.
  - (1) Through lines telephone requirements:

| AWS                      | 2  | pairs |
|--------------------------|----|-------|
| Reinforcing artillery    | 5  | pairs |
| Reinforcing AA artillery | 5  | pairs |
| Fourth Army              |    | pairs |
| Sector                   | 2  | pairs |
| Sub-sector               |    | pairs |
| Land defense forces      |    | pairs |
| Interceptor Command      |    | pairs |
|                          | 27 | pairs |

(2) A total of twenty-seven (27) pairs will be included in trunk cable requirements. Provision will be made for the above pairs to be terminated at each fire control switchboard so that they may be set as local lines or through lines as required by the situation.

$$\frac{S}{S} = \frac{C}{C} \frac{R}{R} = \frac{T}{S}$$

Note 3: Board recommends that SL 5 be moved from its present location to a

point about 900 feet Northwest of Battery Murphy.

Note 4: Towers for SL's 7 and 8 have recently been constructed giving lights

 $\frac{S \to C}{R \to T}$ Section/"C" Page 1.

a height of site of approximately 60 feet.

Note 5: Board recommends that SL's 9 and 10 be raised approximately 30 feet in elevation by construction of wooden towers with SL shelters on top

of each tower. This is necessary as lights are partially blacked out by new construction on South jetty and sand dunes on Clatsop Spit.

Note 6: SL's 11 and 12 (Portable SL's AA type) located on the Camp Clatsop Military Reservation.

Note 7: SL's 13 and 14, and SL's 17 and 18 (Portable SL's AA Type). No land to be purchased. Land to be occupied by permission of owner.

#### SEARCHLIGHT CONTROLLER STATIONS

(After completion of modernization program)

| Tactical No. | Location of Controller (New Designation of Station)   |
|--------------|---|
| 1            | B <sup>1</sup> 4 S <sup>1</sup> 4                     |
| 2            | B1 54   |
| 3            | At SL #3, Fort Canby                                  |
| 4            | At old G-2 Station, Fort Canby                        |
| 5            | B5 S5, Fort Columbia                                  |

| 16           | At SL #16, )  |
| 17           | At SL #17, ) Beach, North of Gearhart, Oregon         |
| 18           | At SL #18, )  |
| 19 and 20    | None, in reserve.                                     |

<sup>23.</sup> SHELTER (other than that at tactical positions) requirements for the above lights are as indicated in the following subparagraphs and the indicated Exhibits:

Section "C", Page 5.

- a. No shelter is required for SL's 1 to 10 inclusive as suitable shelters are provided at the tactical positions.
- b. An existing searchlight shelter, located at Fort Stevens, Oregon, is an adequate shelter for portable SLs not provided with shelters at the tactical positions. This is a wooden frame, corrugated iron siding structure 24 x 120', located about 200 yards southeast of Battery Pratt. It has sufficient storage space for eight (8) portable lights and equipment.
  - c. For general location See Exhibit B-1.
- d. The board recommends that a wooden shed be built at each portable searchlight position to house light and power plant. These sheds to be used by searchlight crews when working on lights and for storage of lights and power plant during hours of daylight. Shelters for following portable lights are recommended: SL's 11, 12, 13, 14, 15, 16, 17 and 18.
  - 24. COST ESTIMATE AND PRIORITY GUIDE: See Exhibit C-3.

#### SECTION "D"

#### UNDERWATER DEFENSE

25. The underwater defense project for these Harbor Defenses is prescribed in the 19th indorsement, AG 660.2 (2-21-35) (Misc) E, dated June 30, 1937, and may be briefly described as follows: This project as approved by the Joint Board provides for seven groups of controlled mines and two listening posts. The location of the mine fields and the listening posts as chosen by the Joint Board are shown on Exhibit B-15.

26. The requirements for submarine mine shore installations (other than those pertaining to gun batteries assigned to mine defense) now authorized, those existing, and those remaining to be installed or procured, are as noted in the lettered subparagraphs below. Funds in the amount of \$100,000.00 have been allotted for the following submarine mine projects. These projects are now in the process of construction. Reference, letter OCCA 3, April 17, 1941, subject "Expenditure Program, Seacoast Defense Funds, 1941," to CG Western Defense Command. The following projects have been approved.

| PROJECT   | ES  | T. ( | COST       |
|---|-----|------|------------|
| Installation of crane on mine wharf Purchase two (2) 4-ton locomotives and 4 flat cars Install passing track, switches and additional track | \$  |      | 000<br>800 |

| Enlarge mine storeroom  |     | 10,0 | 000        |
| Construct new mine loading room   |     | 12,0 | 000        |
| Construct new magazine, TNT   |     | 20,0 | 000        |
| Enlarge cable tank  |     | 10,0 |            |
| Dredge basin for small mine boats   | _   | 18,  | 100        |
| Total   | \$1 | 00,0 | 000        |

For general location of mine shore installations see Exhibit B-1

### a. Mine Casemate.

Authorized

Existing

Not adequate. To be gas and bomb-proofed.

Funds have been allotted to gas and bomb-proof the easemate. (See reference paragraph 26 above). Structure now under construction.

For general location see Exhibit B-1.

### b. Mine Loading Room.

Authorized

Existing

Not adequate. New structure 'o be built,

Section "D", Page 2.

Funds have been allotted to construct a new mine loading room. (See reference paragraph 26 above). New structure almost completed.

For general location see Exhibit B-1.

#### Cable Tanks.

Authorized

Existing

Not adequate. Existing tank to be enlarged.

Funds have been allotted to enlarge the existing cable tank. (See reference paragraph 26 above). Structure almost completed.

For general location see Exhibit B-1.

#### Wharf.

Authorized

Existing

Not adequate. Crane to be installed on mine wharf.

Funds have been allotted to install a crane on mine wharf. (See reference paragraph 26 above). Now under construction.

For general location see Exhibit B-1.

### Magazines for TNT and fuse storage. Authorized, existing, adequate.

#### (1) Present storage plan.

- (a) The project requirements of 54,400 pounds of TNT are now on hand and are stored in two recently constructed TNT magazines.
- (b) The 1076 fuses are stored in a magazine of old Battery Smur.
- (c) The storage plan complies with the safety provisions of TR 1370-A.

#### f. Mine Plainter.

One required and none on hand.

### g. DB Boats.

The L-64, on hand, is assigned to the Mine Command. (For moorage facilities see paragraph 28j).

### h. Yawl Boats.

Three mine yawls, M-332, M-333, and M-296, are on hand  $\frac{S \to C \times E \to T}{m-1}$ 

$$\frac{S \to C R \to T}{\cdots}$$

and one additional mine yawl is required. Four yawls only are now authorized. One yawl will have to be procured. The board recommends that this yawl be built by a local boat builder. A boat 26 feet long and of a type similar to the small fishing boats now used in this vicinity is just what is needed for the Columbia River. The board further recommends that a sum of money not to exceed \$2,500 be allotted the Harbor Defense for this purpose.

#### i. Land Requirements.

There are no land requirements for the underwater defense Project.

#### j. Mooring Basin.

#### Authorized

Under construction immediately behind the loose stone seawall at the mine wharf.

Funds have been allotted to dredge a basin for small mine boats (see reference paragraph 26 above).

For general location see Exhibit Bel.

#### k. Boat House.

Authorized

Existing

Adequate

The boat house is a corrugated iron siding structure, located at the land end of the mine wharf. Shelter for four mine yawls is provided. The yawls are moved to and from their place of launching by means of boat cars. This is a very slow process at its best and is unsatisfactory. The proposed mooring basin with its design, location and layout will provide proper launching facilities for the mine yawls.

#### 1. Mine Storeroom.

Authorized

Existing

Not adequate. An additional new structure now under construction.

Funds have been allotted to construct a new mine storeroom. (See reference paragraph 26 above).

For general location see Exhibit B-1.

# m. Locomotives and Flat Cars.

#### Authorized

To be procured. Two (2) locomotives purchased and on hand.

$$\frac{S \to C/R \to T}{\text{Section "D", Page 4.}}$$

Funds have been allotted to purchase two (2)  $\mu$ -ton locomotives and four ( $\mu$ ) flat cars (see reference paragraph 26 above).

# n. Listening Posts.

Authorized

To be constructed.

# o. Life Rafts for DB Boat.

The board recommends a rubber or tank type life raft be supplied for each DB boat.

27. COST ESTIMATE AND PRIORITY GUIDE.

See Exhibit D-1.

For Mine Installations sketch see Exhibit D-2.

 $\frac{S \to Q \times E \to T}{Section} = 0$ 

#### SECTION "E"

#### ANTIAIRCRAFT ARTILLERY

### 28. ANTIAIRCRAFT GUN DEFENSE.

- a. There are no existing 3-inch fixed AA batteries in the current project of this Harbor Defense and none are authorized.
- <u>b</u>. The board believes that six (6) units of mobile AA gun batteries are necessary to furnish a reasonable AA gun defense for the Harbor Defense installations. In arriving at this solution the board assumed that the antiaircraft protection of important adjacent establishments, such as the Tongue Point Naval Base, Astoria Docks, etc., outside of the limits of the Harbor Defense military reservation, will be a function of the mobile force.
- c. For disposition of AA gun defense recommended by the board, see Exhibit E-1.
- d. No antiaircraft gun ammunition storage facilities were considered as the board believes the ammunition supply of these AA mobile units to be a function of the Fourth Army.

### 29. ANTIAIRCRAFT SEARCHLIGHT DEFENSE.

- a. Since six (6) AA gun batteries (number in two (2) AA regiments) are considered essential to provide a reasonable defense and since it is advisable not to break up tactical units, the board believes that the thirty (30) AA searchlights of two (2) AA regiments will afford the necessary AA searchlight defense.
- b. For disposition of AA searchlight defense recommended by the board, see Exhibit  $\underline{E}=\underline{2}$ .

### 30. AA AUTOMATIC WEAPONS DEFENSE.

- a. The local board assumes that the present authorized allowance of twelve (12) 50 caliber machine guns and twelve (12) 37mm AA guns will not be reduced under the modernization program. The use of the above authorized weapons will not afford a reasonable defense for the Harbor Defense installations under the modernization program. The additional automatic weapons (six (6) 37mm gun batteries and two (2) .50 caliber MG batteries) in two (2) AA regiments are believed necessary to afford a reasonable and adequate area defense for the Harbor Defense installations.
- b. The board recommends that these automatic weapons be distributed as follows:

 $\frac{S \to C / R \to T}{S - C + C - R}$ Section "E", Page 2.

Note 1: The magazines of existing seacoast batteries "No longer required" are adequate for storage of this ammunition.

licte 2: There is none of this equipment or ammunition on hand.

SECRET

31. The requirements for the Harbor Defense Antiaircraft Intelligence Service are as described below and as shown on Exhibit E-3.

- a. The AAIS for the Harbor Defense will provide for the simultaneous alerting of all elements of the defense concerned. Each fort will be furnished a siren or sirens to alert all AA elements located on that fort. All three sirens are now so connected that all three can be sounded at the same time from any one of the three forts.
- b. The AAIS center will be located at the HDCP, Fort Canby, Washington. This station will be connected directly by telephone with the AWS center at Portland, Oregon. This service is now in operation with two direct lines connected with the AWS at Portland to the HDCP at Fort Stevens, Oregon.
- c. The AAIS OP'S are as shown on Exhibit E-3. These OP'S will be connected directly by telephone with the AAIS center at HDCP.
- d. Extra telephone pairs will be provided at project battery base end stations, BC's, HDCP, of settera, in order that Army Mobile Units for this area may tie in with the local AAIS center.
  - 32. COST ESTIMATE AND PRIORITY GUIDE.

See Exhibit E-4.

Section "F", Page 1.

#### SUPPORTING AIRCRAFT

#### 33. MISSION AND REQUIREMENTS.

a. As there will be three long range gun batteries (6" BC) with a maximum range of 27,000 yards, in the Harbor Defense after the modernization program is completed, supporting aircraft will be required to supplement terrestrial observation and furnish surveillance of defensive coastal areas. One observation flight (six airplanes) is sufficient to meet these requirements.

# b. Landing fields (exhibit F-1).

- (1) Ilwaco Airport. This airport is located at Ilwaco, Washington, on the North side of the mouth of the Columbia River. It has a runway 2,000 feet in length, rock surfaced, and with clear approaches. There is a one plane hangar. Meteorological conditions: periodical fog, heavy rains in rainy season (October to April), occasional snow.
- (2) Astoria Airport. This airport is located West of Astoria, Oregon, approximately seven miles from Fort Stevens. The field is now under repair and rehabilitation with date of completion set for February 19, 1942. When completed, the field will have three runways: The first a NW-SE runway 4,000 feet long, 500 feet wide with a center paved strip 150 feet wide, the second a NE-SW runway, 4,400 feet long, 500 feet wide with a center paved strip 150 feet wide with a center paved strip 150 feet wide, and the third an EW runway 5,800 feet long, 500 feet wide with ne paved center strip. Hangar facilities will consist of a small building capable of housing four small planes. Meteorological conditions; same as Ilwaco Airport.
- (3) Camp Clatsop Landing Field. It is located about eight miles South of Fort Stevens, it has one runway 4,500 x 400 feet, with a N-S direction. Meteorological conditions: same as Ilwaco Airport. Landing field is not useable at the present time as barbed wire entanglements crisscross the field.
- (4) Naval Air Base at Tongue Point. This is a Navy air base located at Tongue Point near Astoria, Oregon. It has facilities for landing of seaplanes only.

#### GAS DEFENSE

34. a. For the three new project batteries in the modernization program, provision is made in this project for the complete gas-proofing of the plotting rooms, latrines and a large rest room. Aid Stations are to be established in the rest rooms.

- b. For personnel outside of gas-proofed rooms, reliance is placed on gas masks, protective clothing and decontamination of personnel, structures, and areas.
- c. The HDCP, Fort Switchboard Rooms, Mine Casemate and the Mine Plotting Room will also be provided with standard gas-proofing installations. It is not contemplated that collective protectors will be provided for batteries to be eliminated under the modernization program.
- d. The estimate of cost includes the use of decontaminating apparatus and materials, for each battery as follows:

2 sets of 3-gallon hand demustardizing apparatus of the pressure type.
One ton of demustardizing agent (chloride of lime) 3750 pounds of acetylene tetrachloride.

### LAND REQUIREMENTS

| Exhibit No. | Title   |
|-------------|---|
| H-1         | Summary of Land Requirements Recommended and Cost.            |
| H-S         | Proposed Land Requirement East of Camp Clatsop.               |
| H-3         | Columbia Beach Land Map.                                      |
| н-Ц         | North of North Head Land Map. Belview State Park, Washington. |

Location No. 17

### PRELIMINARY DATA FOR PROPOSED LAND REQUIREMENTS

- 1. For installation of Base end station. By Signature  $\frac{1}{2}$  S
- 2. Place (local name) East of Camp Clatsop.
  Town, Near Warrenton, County Clatsop, State Oregon.
- 3. Owner: Name John C. Smith Estate.
  Address Warrenton, Oregon.
- 4. Area to be acquired 40 acres.
- 5. Site is part of: Farm? No. Summer Estate? No.
- 6. Site is: Developed? No. Undeveloped? Yes.
- 7. Active shore lot development? No. Inactive? Yes.
- 8. Does site include buildings? No:
- 9. Is site contiguous to public road? Yes.
- 10. Is easement required for right of way? No.
- 11. Is easement required for cable? No.
- 12. Assessed value of land. \$25.00 per acre. Buildings? liene.
- 3. Estimated purchase cost of land. \$2,000.
- 11. Estimated cost of right of way. None.
- 15. Estimated cost of cable easement. None.
- 16. Estimated cost of removal of utilities. None.
- 17. Estimated cost of taking survey. \$300.
- 18. Estimated cost of legal transfer. \$100.
- 19. Total estimated cost of site. \$2,400.
- 20. Do you believe condemnation proceedings necessary? No.

#### ADDENDA

The Board urgently recommends the adaption of items under paragraphs 5 c and d of these proceedings. The board is in unanimous agreement that the armment would not be capable of withstanding aerial attack, without these items of protection, and the cost of the installations contained in these proceedings would thereby become a gross waste of public funds.

Section "H", Page 2.

The board adjourned January 17, 1942, to meet at the call of the President.

CLIFTON M. IRWIN,

Colonel, Coast Artillery Corps,

President.

C. R. MOORE,

Colonel, Corps of Engineers,

Member.

K. ROWNTREE,

Lieutenant Colonel, 18th Coast Artillery,

Member.

PORTER T. GREGORY, Major, 18th Coast Artillery,

Member.

Major, 249th Coast Artillery,

Recorder.

Section  $\underline{H}$ Exhibit  $\underline{H-1}$  4/200

Fort Stevens, Pregon September 17, 1942

PROCEEDINGS OF A LOCAL BOARD OF OFFICERS CONVENED AT THE HARBOR DEFENSES OF THE COLUMBIA PURSUANT TO:

Paragraph 1 d., AR 100-20
Paragraph 5, Letter, Headquarters Western Defense
Command and Fourth Army, Subject: Salvage of obsolete armament, file 400.93 (HD) dated August 9, 1942.

TO SURVEY ARMAMENT OF THE HARBOR DEFENSES OF THE COLUMBIA FOR SALVAGE.

Fill

DOD Dir. 5200.9, Sept. 27, 1958
NCWN by date 5-20-20

The Local Harbor Defense Board was appointed by letter:

HEADQUARTERS WESTERN DEFENSE COMMAND AND FOURTH ARMY OFFICE OF THE COMMANDING GENERAL Presidio of San Francisco, California

June 20, 1942

660.2 (6-3)

SUBJECT: Local Harbor Defense Boards.

Commanding Officer, Harbor Defenses of the Columbia, Fort Stevens, Oregon. THRU: Commanding General, Northwestern Sector, Fort Lewis, Washington.

1. In accordance with the authority contained in War Department radio dated June 13, 1942, to this Headquarters, all existing Local Harbor Defense Boards in Harbor Defenses of this Command are dissolved and the following Local Harbor Defense Boards are appointed in lieu thereof:

By command of Lieutenant General DeWITT:

(Signod)
R. P. BRONSON,
lst Lieut., A. G. D.,
Assistant Adjutant General,

660.2 (AG)

1st Ind.

Hq. Northwestern Sector, Western Defense Command, Fort Lewis, Washington, June 24, 1942.

To: The Commanding Officer, Harbor Defenses of the Columbia, Fort Stevens, Oregon.

Inviting attention to basic letter.

By command of Major General MUIR:

(Signed)
J. WILLARD WAGNER,
Major, A. G. D.,
Assistant Adjutant General

Secret Letter, Headquarters Western Defense Command and Fourth Army, Subject: Personnel Requirements for Harbor Defenses in the U.S., file 320.2 (6-3), dated July 2, 1942 and inclosure number 1 thoreto, (secret letter TAG to WDC, same subject, file AG 320.2 (6-1-42)MO-E, dated June 2, 1942 with six (6) inclosures thereto.)

d. Teletype from Ordnance Officer, Fort Lewis, Washington to Commanding General, Ninth Corps Area, Fort Douglas, Utah, dated May 14, 1942 with fifteen indorsements thereto, all pertaining to Railway Mortar Batteries,

Point Brown, Washington and Fort Lewis, Washington.

e. Proceedings of Joint Army and Navy Planning Committee, Northwestern Sector, November 18, 1941. Project for Temporary Harbor Entranco Control Post, War Department Buildings and Facilities, Harbor Defenses of the Columbia, and inclosure number 1 thereto.

2. The Board met pursuant to paragraph 5 of reference la above with all members present except Lt. Colonel Donald J. Leehoy, C.E. After due consideration of the status of the Modernization Project Batteries and the present status of the "interim project" armament of these Harbor Defenses, the following report and recommendations are submitted:

a. In accordance with instructions contained in reference lc above, Battery Clark, Fort Stevens, and Battery Guenther, Fort Canby, 12 inch Mortar Batteries, were placed in class "B" status. The personnel formerly assigned to this armament have been assigned to other missions. No other personnel is available, or is anticipated to be made available, to man this armament. The following number of rounds have been fired from these batteries:

|         | Battory   | Clark, ta    | acti <b>c</b> al Gun | A-2<br>B-1<br>B-2 | 147<br>124      | rounds. rounds. rounds. rounds. |
|---------|-----------|--------------|----------------------|-------------------|-----------------|---------------------------------|
| Battery | Guenther, | tactical Gun | #A-1<br>A-2<br>B-1   | 100               | rounds. rounds. |                                 |
|         |           |              |                      | B-2               | 61              | rounds.                         |

(1) The Board recommends that Battery Clark and Battery Guenther be classed as no longer needed and made available for salvage.

b. Construction of Modernization Project Battery number 246, Fort Columbia, Washington will be started in the near future and completion is

expected approximately in July 1943. With the completion of Battery number 246, Battery Murphy 6 inch DC Fort Columbia will be classed as no longer needed and can be made available for salvage. 114 rounds have been fired from tactical gun number 1 and 190 rounds from tactical gun number 2.

(1) The Board recommends that Battery Murphy, 6 inch DC be retained in the "interim project" armament until Battery number 246 is completed. Upon completion of Battery number 246, it is recommended that

Battery Murphy be made available for salvage.

c. Battery Allen, 6 inch DC, at Fort Canby is to be replaced by Modernization Project Battery number 247. Construction on Battery number 247 will be started in the immediate future and completion is expected approximately July, 1943. Battery Allen is the best strategically located battery of the "interim project" armament, having a height of site of approximately 200 feet and range of 15,000 yards. The field of fire covers all approaches to the Columbia River. 326 rounds have been fired from tactical gun number 1 and 298 rounds have been fired from tactical gun number 2. In view of the fact no fire control stations or equipment of Battery Allen are contemplated for use with Modernization Project Batteries, it is believed no action should be taken at this time with reference to this battery.

(1) The Board recommends that Battery Allen be retained in the "interim project" armament and that any recommendations for salvage be de-

ferred until completion of Battery number 247.

d. Battery Russell, 10 inch DC, Fort Stevens, has been recommended to be abandoned upon completion of the Modernization Program. The placing of the 12 inch Mortar Batteries in class "B" status leaves Battery Russell as the only remaining medium caliber battery in these Harbor Defenses. The battery is well located facing the ocean and covers all approaches to the entrance of the Columbia River. Should this battery be abandoned prior to the completion of batteries number 245 and number 247, a large area of the field of fire to the south of Fort Stevens would not be covered by any existing armament. 325 rounds have been fired from tactical gun number 1 and 317 rounds from tactical gun number 2.

(1) The Board recommends that Battery Russell be retained in the "interim project" armament and that any recommendations for salvage be deferred until completion of Project Batteries number 245 and number 247.

e. Battery Pratt, 6 inch DC, Fort Stevens has been recommended to be abandoned at the completion of the Modernization Program. This battery is sited facing the Columbia River and provides excellent coverage of the planted project Mine Field. Should this battery be abandoned prior to completion of Battery number 245 at Fort Stevens and number 246 at Fort Columbia, adequate coverage of the Mine Field could not be obtained. This is for the reason that during many months of the year fog conditions and visibility are such that the entrance to the Columbia River and the water area containing the planted Mine Field is not always visible from Battery Murphy at Fort Columbia. Without Battery number 245 or Battery Pratt it is quite possible that hostile ships could enter the Columbia River and not be seen by or taken under fire from Fort Columbia. 38 rounds have been fired

from tactical gun number 1 and 42 rounds from tactical gun number 2.

(1) The Board recommends that Battery Pratt be retained in the "interim project" armament and that any recommendations for salvage be do-

forred until completion of the Modernization Program.

- f. Battery Mishler, 10 inch DC, Fort Stevens has been in class "C" status for soveral years. Within the emplacement has been constructed the Harbor Entrance Control Post and Harbor Defense Command Post. Sec reference le above. The top emplacement has been completely camouflaged by covering over the gun wells with timbors and the entire emplacement covered with earth and sod, 'Trocs and brush have been transplanted onto the emplacement to cause it to blend with the adjacent terrain. The upper galleries and gun wells were sealed completely with asphaltic cement to prevent the seepage of water into practically all parts of the lower galleries where the Harbor Entrance Control Post and Harbor Defense Command Post are located. The walls and ceiling of the lower galleries have been covered with "Nu-Wood" (fibre board), which if it is subjected to dampness, will have to be replaced. Any water scepage will be damaging to interior communications, radio equipment of the Army and Navy and the operations room equipment. To remove these guns will necessitate complete removal of camouflage which took several months to plant and place. The U.S. Area Engineer advisos that the stress and strain on the concrete of the emplacement during the removal of this armament will cause numerous fissures to be opened through which water can seep into the lower galleries. It is improbable that such seepage could be located before the "Nu-Wood" walls and ceilings were damaged beyond repair, further, interior wire communications are placed behind the "Nu-Wood" walls and ceilings and would undoubtedly cause communication failures. 69 rounds have been fired from tactical gun number 1 and 67 rounds from tactical gun number 2.
- (1) The Board recommends that Battery Mishler be made available for salvage but only the lead counterweights and such other parts that can be removed through the lower galleries be salvaged at this time.
- g. The Railway Mortar Battery at Point Brown, Washington was not considered in this proceedings due to the fact that the 11th, 12th and 13th indorsements to reference 1d above authorizes and directs the disposal of this armament as salvage.
- h. Battery Lewis and Walker. This is an abandoned emplacement which is scheduled for use as ammunition storage under the Modernization Program. With the exception of the I-beam trolley rails and steel doors, this emplacement has been salvaged.
- (1) The Board recommends that the steel doors be retained for security of the storage of ammunition.
- i. The remaining abandoned emplacements are shown in inclosure number 1.

  (1) The Board recommends that the steel doors of all emplacements be retained for security of future storage of material.
- 3. A report of the amount of salvage metal available in these Harbor Defenses from abandoned emplacements and armament recommended as no longer needed, is added hereto as inclosure number 1.

C. S. Doney, Colonel, C.A.C., President.

(absent)

Donald J. Leehey Lt. Colonel, Corps of Engineers Member. 6! Francis Garracella P. Francis Passarella Major, C.A.C. Member.

Laurence J. Morgan Lawrence J. Morgan Major, C. A. C. Recorder,

# SALVAGE OF OBSOLETE ARMAMENT HARBOR DEFENSES OF THE COLUMBIA

Inclosure #1 to Proceedings of Local Harbor Defense Board, Harbor Defenses of the Columbia, September 17, 1942.
