

# ***A Legacy in Brick and Stone – 2<sup>nd</sup> Edition***

**American Coastal Defense Forts of the Third System 1816-1867**

**By John R. Weaver II**

*Front Cover for the Softbound B&W Version*

The definitive history of the American Third System of Fortifications that defended our coastline for more than half of century, these architectural wonders were built from 1816 through 1867 from Maine through the Florida Keys to New Orleans, with two forts in San Francisco Bay. Most of these 42 masonry forts still stand guard along our shores, and are open to the public. *A Legacy in Brick and Stone* provides the background of these famous Civil War forts – why they were built where they are, who built them, and how they functioned – as well as descriptions of each of the forts.

This revised and expanded edition has grown to 340 pages with 400 new photographs and drawings. John Weaver II, a nationally known expert on masonry coastal fortifications, has invested over 30 years of research into *A Legacy in Brick and Stone* to produce the only a full treatment of the magnificent American

Third System. This book is a must buy for any serious student of American fortifications or the American Civil War.

The book begins with a study of the history of the Coastal Fortifications Board, which developed and implemented this massive defense project. It then details the art of fortification of that period and describes the particular architecture components that were key to their design. A description of the development of the system over its 50-year life is followed by an analysis of how well certain forts held up under attack during the American Civil War. Approximately two-thirds of this volume is dedicated to a fort-by-fort description of the system. The overall defense scheme for each harbor is discussed, then each fort in that harbor is analyzed. The author uses unique photographs and drawings to answer many of the questions about of these forts that today's visitors ask. The book also documents the current status of these historic forts, including information about how to visit these forts today.
